Lucintel forecasts that the porcine sourced gelatin will remain the largest segment over the forecast period as it is rich in collagen proteins, which are considered to be more stable in comparison with gelatin from other sources.

Within this market, food and beverage will remain the largest segment by application over the forecast period as it is a highly rich protein source to be incorporated into functional and nutritional food and beverage products.

Europe will remain the largest region and it is also expected to witness the highest growth over the forecast period due to high demand for nutritional and functional food and beverage products along with the growing pharmaceutical industry and abundant availability of raw materials.
