Abstracts

The global 3D printing materials market is expected to grow with a CAGR of 18.2% over 2015-2020. The major drivers of the 3D printing materials market are rapid acceptance of 3D printing technology from prototyping, product designing, and concept modelling to final product manufacturing, growing awareness and market penetration of 3D printing technology in various application sectors, such as medical, aerospace, automotive, and consumer products. Decreasing price of 3D printers is fostering its wide acceptance and leading the growing demand of 3D printing materials. North America is expected to remain the leading region because of the growth in end use applications market in emerging markets, such as India and China. Heavy investment by the regional players on research and development and extensive expansion in product portfolio contributed to high consumption of 3D printing materials.

Lucintel, a leading global management consulting and market research firm, has analyzed the global 3D printing materials market by applications, material types, and regions, and has come up with a comprehensive research report, "Global 3D Printing Materials Market 2015-2020: Trends, Forecast, and Opportunity Analysis." This report provides an analysis of global 3D printing market, including the market trends, growth opportunities, key drivers, emerging trends, and company profiles of the leading suppliers in the market. The study also includes forecast of global 3D printing materials market through 2020, segmented by applications, material types, and regions as follows:

The global 3D printing materials market by applications: Automotive Consumer Products Medical Aerospace Other Applications

The global 3D printing materials market by material types: Photopolymers

Thermoplastics Metals Ceramics Others

The global 3D printing materials market by regions: North America Europe Asia Pacific Rest of World

On the basis of its comprehensive research, Lucintel forecasts that majority of the applications for the 3D printing materials will have good growth during 2015-2020. Medical along with consumer products segments are expected to emerge as the largest market for 3D printing materials in 2020. Stratasys Ltd., The ExOne Company, 3D System, Arcam AB, and EOS GmbH Electro Optical Systems are among the major suppliers of 3D printing materials. The industry players are going for partnership and strategic alliances to deliver unique solutions and to meet the constantly changing industry demands of customers.

This unique report from Lucintel will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market. This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today's stringent economy, you need every advantage that you can find.

To make business, investment, and strategic decisions, you need timely, useful information. This market report fulfills this core need and is an indispensable reference guide for multinational materials suppliers, product manufacturers, investors, executives, distributors, and many more that operate in this market.

Some of the features of "Global 3D Printing Materials Market 2015-2020: Trends, Forecast, and Opportunity Analysis" include:

Market size estimates: Global 3D printing materials market size estimation in terms of volume (Kt.) and value (\$M) shipment. Trend and forecast analysis: Global 3D printing materials market trend (2009-2014) and forecast (2015-2020) by regions and by segments. Segmentation analysis: Global 3D printing materials market size by various material types such as photopolymers, thermoplastics, metals, ceramics and others both in terms of volume and value shipment. Global 3D printing materials market size by various end-use industries such as automotive, consumer products, medical, aerospace, and others both in terms of volume and value shipments. Regional analysis: Global 3D printing materials market breakdown by key regions such as North America, Europe, Asia Pacific, and Rest of the World. Growth opportunities: Analysis on growth opportunities in different applications and regions. Strategic analysis: This includes

M&A, new product developments, competitive landscape, and expansion strategies of Global 3D printing materials suppliers. Emerging applications: Emerging applications of Global 3D printing materials products in various markets. Analysis of competitive intensity of the industry based on Porter's Five Forces model.

Contents

Executive Summary

2. 3D PRINTING MATERIALS INDUSTRY BACKGROUND AND CLASSIFICATIONS

2.1: Introduction

2.1.1: Industry Classification

2.1.2: Markets Served

2.1.3: Supply Chain

3. MARKET TREND AND FORECAST ANALYSIS

3.1: Market analysis 2014

3.1.1: Global 3D printing materials market by value and volume

3.1.2: Regional 3D printing materials market by value and volume

3.2: Market trend 2009-2014

3.2.1: Macroeconomic trends

3.2.2: Global 3D printing materials market trend by value and volume

3.2.3: The North American 3D printing materials market trend by value and volume

3.2.4: The European 3D printing materials market trend by value and volume

3.2.5: The APAC 3D printing materials market trend by value and volume

3.2.6: The ROW 3D printing materials market trend by value and volume

3.2.7: Industry drivers and challenges

3.2.7.1: Drivers of global 3D printing materials market

3.2.7.2: Challenges for global 3D printing materials market

3.3: Market forecast 2015-2020

3.3.1: Macroeconomic forecasts

3.3.2: Global 3D printing materials market forecast by value and volume

3.3.3: The North American 3D printing materials market forecast by value and volume

3.3.4: The European 3D printing materials market forecast by value and volume

3.3.5: The APAC 3D printing materials market forecast by value and volume

3.3.6: The ROW 3D printing materials market forecast by value and volume

4. COMPETITOR ANALYSIS

4.1: Product portfolio analysis

4.2: Market share analysis

- 4.3: Growth leadership analysis
- 4.4: Porter's Five Forces Analysis

5. GROWTH OPPORTUNITY & STRATEGIC ANALYSIS

- 5.1: Growth opportunities analysis
- 5.2: Emerging trends in global 3D printing materials industry
- 5.3: Strategic analysis
 - 5.3.1: New product development
 - 5.3.2: Expansion strategy
- 5.4: Mergers and acquisitions in global 3D printing materials market

6. COMPANY PROFILES OF LEADING PLAYERS
