Abstracts

The global agricultural equipment industry is expected to grow at a CAGR of 3.5% during 2014-2019. The major drivers of the agricultural equipment industry are rising food consumption, increase in crop production, availability of credit, availability of resources, and technological development. The increasing subsidies on agricultural equipment and the increasing awareness on productivity will also boost the agricultural equipment industry. Strong economic growth in the developing nations such as China, India, and the Middle Eastern countries will further drive this industry.

Lucintel, a leading global management consulting and market research firm, has analyzed the global agricultural equipment industry by various segments and regions, and has come up with a comprehensive research report "Global Agricultural Equipment Industry 2014-2019: Trends, Forecast, and Opportunity Analysis." This report provides an analysis of agricultural equipment industry including analysis of market trends, competitive landscapes, company profiles, emerging trends, and key drivers of industry growth. The study also includes global agricultural equipment industry forecasts through 2019, segmented by regions and markets as mentioned below:

The global agricultural equipment industry by regions:
