Abstracts

Despite the adverse economic conditions that have prevailed recently, global commercial aero turbofan engine industry sales rose during the last five years (2006-2011). The turbofan engine market is expected to grow to \$29.6 billion by 2017 at a CAGR of 6% over the next five years.

Lucintel, a leading global management consulting and market research firm, has analyzed the global commercial aero turbofan engine market and offers its findings in its comprehensive research report “Global Commercial Aero Turbofan Engine Market, Supply Chain and Opportunities: 2012-2017”

This report includes the turbofan engine markets for commercial aircraft and highlights narrowbody and wide-body aircraft growth paths for the near future.

This report is geographically segmented in four regions: North America, Europe, Asia Pacific (APAC), and Rest of World. APAC is expected to lead the global aerospace industry because of emerging economies such as India and China.

Lucintel has identified that increase in prices, tough government regulations, and stringent certification processes are the major growth challenges. Drivers such as increasing traffic forecast, demand for light aircraft and low-cost carriers, and fuel-efficient engines provide competition within the market.

Lucintel's analysis indicates that OEMs and component suppliers for aircraft engines are anticipated to recognize two existing short-term and long-term business scenarios. Due to the effects of economic downturn, the industry is likely to experience small

growth in the short run, while moderate opportunities exist in the long run driven by significant trends in demand quantity, consumption, and growth based on various aircraft types.

This Lucintel research report provides an important understanding of recent market scope, background and overview, market trends and analysis, cost comparison, product portfolio analysis, relative market attractiveness by region, emerging trends, market price trends, and forecasts and analysis of the major market players.

This unique report from Lucintel provides valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market. This report can save hundreds of hours of research time and will significantly benefit you in expanding your business in this market. In today's volatile economy, you need every advantage that you can find.

Contents

1. EXECUTIVE SUMMARY

2. GLOBAL AERO ENGINE COMMERCIAL TURBOFAN INDUSTRY OVERVIEW

2.1: Global aerospace market

2.2: Global aero engine commercial turbofan market

2.3: China aero engine industry overview and recent development

3. GLOBAL AERO ENGINE COMMERCIAL TURBOFAN MARKET ANALYSIS: 2011

3.1: Global aero engine commercial turbofan market analysis

3.2: Market share of aero engine commercial turbofan market by aircraft type

3.3: Market share of aero engine commercial turbofan market by engine manufacturers

3.3.1: Market share of aero engine commercial turbofan market by engine manufacturers in narrow-body aircraft

3.2: Market Share of aero engine commercial turbofan market by engine manufacturers in narrow-body aircraft

3.4: Competitive landscape on market served: Porter's Five Forces analysis

4. TECHNOLOGY TREND OF COMMERCIAL TURBOFAN AERO ENGINE INDUSTRY

4.1: Front runner turbofan aero engines

4.2: Technology roadmap of turbofan engine

4.3: Research and development activities in global commercial aero engines

4.4: Material composition in aero engine

4.5: Future technology (upcoming turbofan engines)

5. GLOBAL COMMERCIAL AERO TURBOFAN ENGINE SUPPLY CHAIN ANALYSIS

5.1: Global aero engine supply chain dynamics

5.2: Decision matrix for aero turbofan engine

5.3: Global aero engine market overview by manufacturers

5.5; Company profiling of top aero engine manufacturers

5.6: Company profiling of top customers

6. TREND AND FORECAST OF COMMERCIAL TURBOFAN AERO ENGINE INDUSTRY

- 6.1: Global commercial turbofan aero engine market trend overview**
- 6.2: Global commercial turbofan aero engine market trend by aircraft type**
- 6.3: Global commercial turbofan aero engine market trend by manufacturer**
- 6.4: Turbofan engine inventory by age and manufacturer by airframe type**
- 6.5: Turbofan engine inventory by age and manufacturer for top six airlines**
- 6.6: Global commercial turbofan aero engine market forecast overview**
- 6.7: Global commercial turbofan aero engine market forecast by aircraft type**
- 6.8: Global commercial turbofan aero engine market forecast by manufacturer**
- 6.9: Key drivers and challengers**
- 6.10: Factors shaping the outlook of commercial turbofan aero engine market**
- 6.11: Recent developments in global commercial turbofan aero engine market**

7. GROWTH OPPORTUNITIES AND EMERGING TRENDS

- 7.1: Opportunities in global aero engine market**
- 7.2: Emerging trend in global aero engine market**
