According to this report, Four decades ago, X-ray machines ruled the diagnostic imaging industry until technological advancements changed the face of the industry with the breakthrough entry of 3-D technology. After a modest growth in the last five years, the global diagnostic imaging industry is likely to reach \$25.2 billion by 2017 at a CAGR of 3.4% over 2012-2017.

Four decades ago, X-ray machines ruled the diagnostic imaging industry until technological advancements changed the face of the industry with the breakthrough entry of 3-D technology. After a modest growth in the last five years, the global diagnostic imaging industry is likely to reach \$25.2 billion by 2017 at a CAGR of 3.4% over 2012-2017.

Lucintel, a leading global management consulting and market research firm, has analyzed global diagnostic imaging industry and offers its findings in its comprehensive research report, 'Global Diagnostic Imaging Industry2012-2017:Trend , Profit, and Forecast Analysis.'

APAC's continued high growth during the last five years is due to improving health-related infrastructure and health consciousness. The region is expected to sustain its growth over 2012-2017.

Lucintel's analysis reveals demanding clinical and regulatory standards and increasing pricing and production pressure to be the major industry growth hurdles, while aging population and technology innovation are the two major industry growth injectors. Huge opportunities were afloat for industry players due to changing consumer spending in health-related products and technological advancement.

The major industry players are required to re-invent themselves to meet the fast changing complexities of the world. New innovative technologies are rolled out in the market that focuses on reduced scan time and early detection upon which the industry's prosperity depends. Companies adopting and adapting to portable equipment and 3-D technology will have an edge over their competition. Companies are opting for small firm acquisition to expand and gain market share.

This Lucintel research report provides valuable insights into recent industry scope and overview, global macroeconomic overview, relative market attractiveness by region, annual industry trend, emerging trends, industry forecasts, Porter's Five Forces Analysis, hazards, and the profitability analysis of the major industry players. The data and analysis found in this report can be utilized for a variety of functional business reasons, including business development, strategic planning, determination of market size and trends, competitive analysis, investment decisions, and joint product development.

This comprehensive guide from Lucintel provides readers with valuable information and the tools needed to successfully drive critical business decisions with a thorough understanding of the market's potential. This report will save Lucintel clients hundreds of hours in personal research time on a global market and it offers significant benefits in expanding business opportunities throughout the global diagnostic imaging industry. In a fast-paced ever-changing world, business leaders need every advantage available to them in a timely manner to drive change in the market and to stay ahead of their competition. This report provides business leaders with a keen advantage in this regard by making them aware of emerging trends and demand requirements on an annual basis.

To make any investment or strategic decision, you need adequate and timely information. This market report fulfills this core need. **Some of the features of this market report are:**

Industry size estimates in terms of (US \$) value by regions and by segment

Global diagnostic imaging industry annual trend (2006-2011) and forecast (2012-2017)

Porter's Five Force analysis

New product launch and merger and acquisition activity in global diagnostic imaging insurance industry

Quarterly demand trend (Q1 2010-Q4 2011) and forecast analysis (Q1 2012 Q4 2012) for global diagnostic imaging industry

Gross and net profit trends in the global diagnostic imaging industry

Cost structure trend in the global as well as regional global motor diagnostic imaging industry

More than 47 valuable figures and charts and 12 tables are provided in this report.
