Abstracts

The global automotive seat industry is expected to reach an estimated US \$76.4 billion in 2019 with a CAGR of 4.3% over the forecast period. Growth in BRIC nations is anticipated to drive the industry during the forecast period 2014-2019. The major drivers of automotive seat industry are recovery in vehicle production, demand for vehicle safety features, and growth of small and medium vehicle segments in the emerging markets. Changes in Environmental Protection Agency and National Traffic Safety Administration regulations regarding greenhouse gas emissions and improvement in the fuel efficiency will result in increasing demand for lighter weight seats during 2014-2019. Current initiatives include weight saving technologies, operator safety, and comfort features which will boost the industry
