Abstracts

The global construction industry is expected to reach an estimated value of \$10,388.6 billion by 2019. The major drivers of the construction industry are government spending, increasing population, high per capita income, and GDP growth. Increasing urbanization, easy credit availability, and rising consumer spending will also possibly boost the construction industry. Strong economic growth in developing nations, such as China, India, and the Middle East countries, is expected to further drive this industry.

Lucintel, a leading global management consulting and market research firm, has analyzed the global construction industry by market type and by region and has come up with a comprehensive research report, "Global Construction Industry 2014-2019: Trends, Forecast, and Opportunity Analysis." This report provides an analysis of the global construction industry including market trends, cost structure, growth opportunities, key drivers, and emerging trends of the market.
