## **Abstracts**

The adhesive in global aerospace industry is expected to increase with a CAGR of 3.4% by 2020. The major drivers of adhesive in global aerospace industry is increasing penetration of composites in aircrafts and increasing aircraft deliveries. Many new aircraft programs have high composites penetration for reduction in aircraft weight and fuel efficiency, resulting in increasing demand for adhesives. With the increasing air passenger traffic rate, delivery for aircraft is increasing which will drive the adhesive market.

Lucintel, a leading global management consulting and market research firm, has analyzed the adhesive in global aerospace industry by aircraft type, product type and by region and has come up with comprehensive research report "Growth Opportunities for Adhesive in Global Aerospace Industry 2014-2020: Trend, Forecast, and Opportunity Analysis." This report provides an analysis of the adhesive in global aerospace industry including analysis of the market trends, competitive landscape, company profiles, mergers and acquisitions, emerging trends, and key drivers of industry growth. The study also includes adhesive in global aerospace industry trends and forecasts through 2020, segmented by regions, by aircraft type, and by product type as follows:

Adhesive in global aerospace industry by regions:

North America

Europe

Asia Pacific

Rest of World

Adhesive in global aerospace industry by product type:

Epoxy Adhesive

Other Adhesive

Adhesive in global aerospace industry by aircraft type:

Commercial Aircraft

Regional Aircraft

General Aviation

Defense Aircraft

Helicopters

On the basis of its comprehensive research, Lucintel forecasts that majority of the segments for adhesive in global aerospace industry will grow moderately during 2014-2020. Commercial aircraft segment is expected to grow at faster pace than general aviation and regional jets. Adhesive manufacturers are continuously adopting new strategies to gain market share in this industry. Adhesive in aerospace industry is now replacing traditional fasteners such as rivets, bolts due to increased focus of OEMs and parts manufacturers on lightweight and fuel efficient aircrafts. This will further drive the adhesive market. Henkel, Cytec, Hexcel Corporation are among the major suppliers of adhesive in global aerospace industry.

The biggest challenge the industry faces is government regulations for VOC (Volatile Organic Compound) control. Therefore, customers are demanding eco-friendly products. Another challenge in this industry is the modification or development of products according to specification which involve high R&D expenses and strict certifications by aerospace OEMs and component manufacturers. Regular innovation of

products is very important for companies to sustain their successful position in the market.

This unique report from Lucintel will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market. This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today's stringent economy, you need every advantage that you can find.

## Contents

### 1. EXECUTIVE SUMMARY

### 2. INDUSTRY BACKGROUND AND CLASSIFICATIONS

#### 2.1: Introduction

#### 2.2: Classification of adhesive market

2.2.1: Advantages of adhesive usage in global aerospace industry

2.2.2: Difficulties in adhesive usage

2.2.3: Adhesive in global aerospace industry

2.2.4: Application of adhesives in global aerospace industry

2.2.5: Supply chain

### 3. MARKET TREND AND FORECAST ANALYSIS

#### 3.1: Current market analysis 2013

3.1.1: Adhesive in global aerospace industry by value and volume

3.1.2: Adhesive in global aerospace industry by segment (material type)

3.1.3: Adhesive in global aerospace industry by aircraft type

3.1.4: Adhesive in global aerospace industry by Region

#### 3.2: Market trend 2008-2013

3.2.1: Macroeconomic trends

3.2.2: Adhesive in global aerospace industry by value and volume

3.2.3: Adhesive trend in North American aerospace industry by value and volume

3.2.4: Adhesive trend in European aerospace industry by value and volume

3.2.5: Adhesive trend in APAC aerospace industry by value and volume

3.2.6: Adhesive trend in ROW aerospace industry by value and volume

3.2.7: Industry drivers and challenges

#### 3.3: Market Forecast 2014–2020

3.3.1: Macroeconomic forecasts

3.3.2: Global aerospace forecast by value and volume

3.3.3: Adhesive forecast in North American aerospace industry by value and volume

3.3.4: Adhesive forecast in European aerospace industry by value and volume

3.3.5: Adhesive forecast in APAC aerospace market by value and volume

3.3.6: Adhesive forecast in ROW aerospace market by value and volume

### 4. COMPETITOR ANALYSIS

- 4.1: Product portfolio analysis
- 4.2: Market share analysis
- 4.3: Operational integration
- 4.4: Porter's Five Forces Analysis

## **5. GROWTH OPPORTUNITY AND STRATEGIC ANALYSIS**

- 5.1: Growth opportunities analysis
  - 5.1.1: Growth opportunity by region
  - 5.1.2: Growth opportunity by segment
  - 5.1.3: Growth opportunity by aircraft type
- 5.2: Emerging trends for adhesive in global aerospace industry
- 5.3: Unmet needs for adhesive in global aerospace industry
- 5.4: Strategic analysis
  - 5.4.1: New product development
- 5.5: Innovations in adhesive for global aerospace industry
- 5.6: Mergers and acquisitions for adhesive in global aerospace industry

## **6. COMPANY PROFILES OF LEADING PLAYERS**

## **7. CUSTOMER ANALYSIS**

- 7.1 Customer in different segments
- 7.2 Major customer profiles
  - Airbus
  - Boeing
  - Bombardier
  - Embraer
  - Cessna Aircraft
  - Gulfstream Aerospace
  - Dassault Aviation
  - Airbus Helicopter
  - Bell Helicopter
  - AgustaWestland
  - GKN Aerospace
  - Spirit AeroSystems Inc.
  - Rolls Royce
  - Mitsubishi Heavy Industries Ltd.
  - Triumph Aerostructures

Latecoere

## List Of Figures

### LIST OF FIGURES

#### Chapter 2. Industry Background and Classifications

Figure 2.1: Adhesive evolution (1910-2013)

Figure 2.2: Aircraft surface bonded with adhesive

Figure 2.3: Classification of aerospace industry according to aircraft type

Figure 2.4: Raw materials (aluminum, steel, titanium, and composites) consumption (%) in commercial aerospace industry

Figure 2.5: Evolution of composites applications in commercial aircraft

Figure 2.6: Application of adhesive in primary structure of aircraft (Source: Boeing)

Figure 2.7: Application of adhesive in secondary structure of aircraft (Source: Delo Industrial Adhesives)

Figure 2.8: Composite materials bonded together using adhesives in aircraft seat trays (Source: Permabond)

Figure 2.9: Appearance of aircraft surface using adhesive for bonding

Figure 2.10: Supply chain of adhesive in global aerospace industry

#### Chapter 3. Market Trend and Forecast Analysis

Figure 3.1: Adhesive distribution (%) in global aerospace industry (\$M) by segment in 2013

Figure 3.2: Adhesive in global aerospace industry (\$M) by segment in 2013

Figure 3.3: Adhesive distribution (%) in global aerospace industry (M lbs) by segment in 2013

Figure 3.4: Adhesive in global aerospace industry (M lbs) by segment in 2013

Figure 3.5: Adhesive distribution (%) in global aerospace industry (\$M) by aircraft type in 2013

Figure 3.6: Adhesive in global aerospace industry (\$M) by aircraft type in 2013

Figure 3.7: Adhesive distribution (%) in global aerospace industry (M lbs) by aircraft type in 2013
