Abstracts

The future of the motion sensors market looks promising with opportunities in consumer electronics, automotive, industrial, healthcare, and aerospace & defense sectors. The global motion sensor market is expected to reach an estimated \$5.7 billion by 2021 and is forecast to grow at a CAGR of 4.6% from 2016 to 2021. The major drivers of growth for this market are increasing penetration of motion sensors in smartphone and tablets, growing interactive motion gaming, and increasing safety and security features in the automotive industry.

Motion Sensors are used in variety of end use sectors, such as consumer electronics, automotive, industrial, healthcare, and aerospace & defense. Lucintel predicts that the demand for consumer electronics is likely to experience the highest growth in the forecast period, supported by increasing demand in smartphone and tablets and growth in wearable devices and in the interactive gaming market.

Within the motion sensor market, MEMS gyroscope motion sensor is expected to remain the largest market. Increasing usage of gyroscopes for image stabilization, high stability, and navigation in the consumer electronics industry is expected to spur growth for this segment over the forecast period.

For business expansion, the report suggests innovation and new product development to reduce power consumption. The report further suggests the development of partnerships with customers to create win-win situations and development of low-cost solutions for the end user.

This unique report from Lucintel will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business

successfully in this market. This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today's stringent economy, you need every advantage that you can find.
