Abstracts

The future of the global aerospace accumulator market looks promising with opportunities in commercial aircraft, regional aircraft, general aviation, helicopter, and military aircraft. The global aerospace accumulator market is expected to grow with a CAGR of 4.7% from 2017 to 2022. The major drivers of growth for this market are increasing aircraft delivery, increasing demand for wide body aircraft, and increasing demand for metal bellows accumulators in new aircraft and aircraft variants.

In this market, there are three major product types: piston accumulators, metal bellows accumulators, and bladder accumulators. Lucintel forecasts that the metal bellows accumulator segment is expected to be the largest of the global aerospace accumulator market. Metal bellows accumulators are maintenance free, so they are replacing piston accumulators. On the basis of our comprehensive research, Lucintel predicts that metal bellows accumulator is expected to show above average growth during the forecast period.

Within aircraft type, the commercial aircraft segment is expected to remain the largest market during the forecast period. Commercial aircraft are the largest in size, so they require larger accumulators that are costlier than any other type of aircraft.

This unique report from Lucintel will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market.

This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today's challenging economy, you need every advantage that you can find.
