Lucintel forecasts that the segments of construction and pipe & tank are expected to show average growth during the forecast period from 2018 to 2023.

Within the global glass fiber market, transportation is expected to remain the largest market by value and volume consumption. Government regulations, such as CAFE Standards in the US and carbon emission targets in Europe, are putting pressure on OEMs to incorporate lightweight materials to curb the overall vehicle weight, and this is the key driver for glass fiber in the transportation industry.

Asia Pacific is expected to remain the largest region by value and volume and is also expected to experience the highest growth over the forecast period because of growth in construction, transportation, and the electrical and electronics segments. Growing economy, growth in population, and urbanization are the major forces that drive the construction segment, especially in China and India.
