Abstracts

The global inspection and testing equipment market in civil engineering is poised for robust growth in the next five years. The testing market is gradually becoming more influential with each passing day as safety and quality control are becoming the basic needs of the civil engineering industry. In APAC region, China and India are the two burgeoning markets for civil engineering inspection and testing equipment. According to market forecasts, the global inspection and testing equipment market in civil engineering is expected to reach \$2,314 million by 2018.

Lucintel, a leading global management consulting and market research firm, has conducted a competitive analysis on this market and presents its findings in "Growth Opportunities in Global Inspection and Testing Equipment Market in Civil Engineering 2013-2018: Trends, Forecast, and Opportunity Analysis." This study provides a concise overview of the global inspection and testing equipment market in civil engineering, in terms of value and projected annual growth.

Lucintel discusses the various challenges and opportunities faced by the global inspection and testing equipment market in civil engineering. Inspection and testing equipment are categorized according to the type of construction materials used; however, the infrastructure growth in this market is stagnant and is affecting, in turn, the growth rate of the testing market. In spite of this challenge, inspection equipment provides prediction of performance and service life of a component or material. It also provides with an assessment for its safe operation.

Lucintel's study encompasses the major drivers. Inspection equipment can predict the performance or service of a material or component. Also, government rules for complying with safety norms are driving the global inspection and testing equipment market in civil engineering.

This report highlights the different aspects of inspection and testing equipment market in the world. Due diligence has been given to the current global market scenario.

The global inspection and equipment market in civil engineering is expected to have significant growth in near future. The top players need to formulate effective marketing strategies to take advantage of the opportunities to realize improved revenue and profitability.

This unique report from Lucintel will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market. This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today's stringent economy, you need every advantage that you can find.

Contents

1. EXECUTIVE SUMMARY

2. INDUSTRY BACKGROUND AND CLASSIFICATIONS

2.1: Introduction

2.1.1: Introduction to inspection and testing equipment in civil engineering industry

2.1.2: Advantages of Inspection and testing equipment in civil engineering

2.1.3: Disadvantages of inspection and testing equipment in civil engineering

2.1.4: Industry classification

2.2: Supply chain

2.3: Porter's Five Forces Analysis

3. MARKET ANALYSIS

3.1: Current market analysis 2012

3.1.1: Global inspection and testing equipment market in civil engineering

3.1.2: Regional inspection and testing equipment market in civil engineering

3.2: Market trend 2007-2012

3.2.1: Global inspection and testing equipment market in civil engineering

3.2.2: North America inspection and testing equipment market in civil engineering

trend

3.2.3: Europe inspection and testing equipment market in civil engineering trend

3.2.4: Asian inspection and testing equipment market in civil engineering trend

3.2.5: ROW inspection and testing equipment market in civil engineering trend

3.3: Industry drivers and challenges

3.4: Market forecast 2013–2018

3.4.1: Global market forecast

3.4.2: North America inspection and testing equipment market in civil engineering: forecast

3.4.3: Europe inspection and testing equipment market in civil engineering: forecast

3.4.4: APAC inspection and testing equipment market in civil engineering: forecast

3.4.5: ROW inspection and testing equipment market in civil engineering: forecast

4. FINANCIAL (COST STRUCTURE, PROFITABILITY, DEBT AND ASSETS) ANALYSIS

4.1: Global inspection and testing equipment market in civil engineering profitability

analysis

4.1.1: Cost structure of global inspection and testing equipment market in civil engineering 2007-2012

4.1.2: Regional trend cost structure for global inspection and testing equipment market in civil engineering

5. COMPETITIVE LANDSCAPE AND GROWTH OPPORTUNITIES ANALYSIS

5.1: Product Portfolio Analysis

5.2: Market Share Analysis

5.3: Growth Opportunities Analysis

6. INDUSTRY STRATEGIC ASSESSMENT

6.1: Emerging trends in global inspection and testing equipment market in civil engineering

6.2: Unmet needs in inspection and testing equipment market in civil engineering

6.3: Innovations and new product launches in inspection and testing equipment market in civil engineering industry

6.4: Mergers and acquisitions in inspection and testing equipment market in civil engineering

7. EXPERT OPINIONS

8. COMPANY PROFILES FOR LEADING PLAYERS

List Of Figures

LIST OF FIGURES

Chapter 2. Industry Background and Classifications

Figure 2.1: Destructive testing of concrete- carbonation depth measurement on concrete core

Figure 2.2: Non-Destructive testing of concrete- using concrete test hammer

Figure 2.3: Classification of global inspection and testing equipment in civil engineering

Figure 2.4: RE-BAR Locator for concrete testing

Figure 2.5: Water retention apparatus for cement testing
