Abstracts

The global tooling composites market is expected to increase at a CAGR of 8.8% by 2019. The major drivers of the tooling composites market are higher costs of metallic counterparts, increase in demand for low weight tools, and decrease in lead time for part manufacturers. The composite tools are made either from glass fiber or carbon fiber mixed with a suitable matrix (resin) such as epoxy, BMI, and others. The composite tools provide lightweight, dimensionally accurate, and affordable tooling. The increasing penetration of tooling composites in aerospace and other niche applications is the driving force of the global tooling composites market. The growing demand for lighter, larger, and more complex structures from end market applications such as wind energy, aerospace, and marine is anticipated to boost the market.

Lucintel, a leading global management consulting and market research firm, has analyzed the global tooling composites market by raw material types, material forms, applications, and regions and has come up with a comprehensive research report, "Growth Opportunities in the Global Tooling Composite Market 2014-2019: Customer, Competitor, and Market Analysis." This report provides an analysis of the global tooling composites market, including the market trends, company profiles, growth opportunities, key drivers, and emerging trends of the market. The study also includes the global tooling composites market forecasts for 2014-2019, segmented by regions, applications, raw material types, and material forms as follows:

The global tooling composites market by regions:

North America

Europe

Asia Pacific (APAC)

Rest of World (ROW)

The global tooling composites market by application for the above regions:

Transportation

Marine

Wind energy

Aerospace

Construction

Others

The global tooling composites market by raw material types:

Glass Fiber

Carbon Fiber

Epoxy Resin

BMI Resin

Other Materials

The global tooling composites market by material form:

Fabric

Prepreg

On the basis of its comprehensive research, Lucintel forecasts that majority of the segments for tooling composites will grow at a robust rate during 2014-2019. The upcoming products and new manufacturing technologies are anticipated to support the market in the coming years. Cytec Corporation, Hexcel Corporation, Airtech Advanced Materials Group, and Royal TenCate NV are some of the major suppliers of the global tooling composites market. The regular innovation of products is very important for companies to sustain their successful positions in the market.

This unique report from Lucintel will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market. This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today's stringent economy, you need every advantage that you can find.

Contents

1. EXECUTIVE SUMMARY

2. TOOLING COMPOSITES MARKET BACKGROUND AND CLASSIFICATIONS

2.1: Introduction

2.2: Industry classification

2.2.1: Markets served

2.3: Supply chain

3. MARKET ANALYSIS

3.1: Current market analysis 2013

3.1.1: Global tooling composites market by value and volume

3.1.2: Global tooling composites by raw material in terms of value

3.1.3: Global tooling composites by material form in terms of value

3.1.4: Regional tooling composites market by value and volume

3.2: Market trend 2008-2013

3.2.1: Macroeconomic trend

3.2.2: Global tooling composites market trend by value and volume

3.2.3: North American tooling composites market trend by value and volume

3.2.4: European tooling composites market trend by value and volume

3.2.5: APAC tooling composites market trend by value and volume

3.2.6: ROW tooling composites market trend by value and volume

3.3: Industry drivers and challenges

3.4: Market forecast 2014–2019

3.4.1: Macroeconomic forecast

3.4.2: Global tooling composites market forecast by value and volume

3.4.3: North American tooling composites market forecast by value and by volume

3.4.4: European tooling composites market forecast by value and volume

3.4.5: APAC tooling composites market forecast by value and volume

3.4.6: ROW tooling composites market forecast by value and volume

4. COMPETITOR ANALYSIS

4.1: Product portfolio analysis

4.2: Market share analysis

4.3: Geographical reach

4.4: Operational integration

4.5: Porter's Five Forces analysis

5. GROWTH OPPORTUNITY & STRATEGY ANALYSIS

5.1: Growth opportunities analysis

5.1.1: Growth opportunities for tooling composites by segment

5.1.2: Growth opportunities for tooling composites market by region

5.2: Emerging trends in the global tooling composites market

5.3: Innovations and new product launches in the global tooling composites market

5.4: Strategic alliances in the global tooling composites market

6. CUSTOMER ANALYSIS

6.1: Customer in different segments

6.2: Customer's geographic reach

6.3: Major customer profiles

7. COMPANY PROFILE OF MAJOR COMPETITORS
