Abstracts

The future of the global hydration bottle market looks promising with opportunities in the various outdoor activities such as camping, hiking, fitness, and travel. The global hydration bottle market is expected to reach an estimated \$10.3 billion by 2023, with a CAGR of 5.6% from 2018 to 2023. The major drivers for the growth of this market are increasing popularity of outdoor activities, and promotional strategies by manufactures such as targeted marketing, product design, and giving more space on shelf by major retail brands.

Emerging trends which have a direct impact on the dynamics of the hydration bottle industry include use of hydration bottle with smart lid and integrated hydration calculator to measure liquid intake, increasing demand for BPA-free water bottle which is 100% eco-friendly and recyclable, and refill-reuse bottle campaign to reduce plastic wastage.

A total of 65 figures/charts and 51 tables are provided in this 150 -page report to help in your business decisions. Sample figures with some insights are shown below. To learn the scope of, benefits, companies researched and other details of this hydration bottle market report, download the report brochure.

Market size estimates: Global hydration bottle market size estimation in terms of value (\$M) and volume (Million Units) shipment. Trend and forecast analysis: Market trend (2012-2017) and forecast (2018-2023) by application, and end use industry. Segmentation analysis: Global hydration bottle market size by various applications such as material type, product type, and sales channel in terms of value and volume shipment. Regional analysis: Global hydration bottle market breakdown by

North America, Europe, Asia Pacific, and the Rest of the World. Growth opportunities: Analysis on growth opportunities in different applications and regions of hydration bottle in the global hydration bottle market. Strategic analysis: This includes M&A, new product development, and competitive landscape of hydration bottle in the global hydration bottle market. Analysis of competitive intensity of the industry based on Porter's Five Forces model.

This report addresses the following key questions:

- Q.1. What are some of the most promising, high-growth opportunities for the global hydration bottle market by material (plastic, stainless steel, glass, and others), product type (regular and insulated), sales channel (offline and online), and price range (low end range/good, mid end range/better, and high end range/best) ?
- Q.2. Which product segment will grow at a faster pace and why?
- Q.3. Which regions will grow at a faster pace and why?
- Q.4. What are the key factors affecting market dynamics? What are the drivers, challenges, and business risks in this hydration bottle market?
- Q.5. What are the business risks and competitive threats in this hydration bottle market?
- Q.6. What are the emerging trends in this hydration bottle market and the reasons behind them?
- Q.7. What are some of the changing demands of customers in the hydration bottle market?
- Q.8. What are the new developments in the hydration bottle market and which companies are leading these developments?
- Q.9. Who are the major players in this hydration bottle market? What strategic initiatives are being taken by key companies for business growth?
- Q.10. What are some of the competing products in this hydration bottle market and how big of a threat do they pose for loss of market share by product substitution?
- Q.11. What M&A activity has occurred in the last 5 years in this hydration bottle market?
