Abstracts

India experienced considerable growth in GDP during 2007-2011. The country is expected to continue its growth momentum and grow with a CAGR of 7.5% over the next five years. The opportunities for doing business here are immense with a huge domestic market along with low cost manufacturing process, cheaper work force etc. Industries are having immeasurable opportunities in organized retail sector, healthcare sector, education, residential housing, banking and financial sector in India.

Lucintel, a leading global management consulting and market research firm, has conducted the political, social, economic and business risk analysis of India and presents its findings in “India Country Analysis 2012-2017: An Evaluation of Political, Social, Economic and Business Risk”

India registered a remarkable economic performance during past 30 years. India’s moves towards economic development includes — Adapting local initiative and interregional competition; integrating with the world; adjusting to new technologies; building world-class infrastructure; and investing heavily in its people.

Lucintel’s research indicates that the economic performance of India seems slowing down in 2011 and the slowdown is likely to continue in 2012 as well, however, both government and central bank have already taken steps to increase domestic consumption. International scenario is likely to have negative impact on overall Indian economic performance in 2012. With government of India stepping up on accelerator of disinvestment, government fiscal deficit is likely to fall down in 2012-13. The year 2014 is expected to be the general election year and new government may continue with reform process.

Research by Lucintel indicates that India has a multi-party political system where government is moderately stable. Risk in political structure of India is due to conflicting situation causing delay in decision making process. Apart from that social risk in India includes the youth bulge problems, rising unemployment levels, rising Income inequalities and corruption of high level prevailing in the country.

This research report provides annual trends for past ten years and forecasts of GDP and population; outlines political, social, economic and business risk analysis of India and recent economic policies analysis of India and more.

The data and analysis found in this report can be utilized for a variety of functional business reasons, including business development, strategic planning, determination of market size and trends, competitive analysis, investment decisions, and joint product development.
