Intumescent Coating Trends and Forecast

The future of the global intumescent coating market looks promising with opportunities in the construction, oil & gas, and automotive markets. The global intumescent coating market is expected to reach an estimated \$1.3 billion by 2030 with a CAGR of 4.0% from 2024 to 2030. The major drivers for this market are rising preference for lightweight materials in the building & construction industry, rising urbanization and growing building & construction industry, and growing awareness, enforcing rules, and emphasizing safety precautions.

A more than 150-page report is developed to help in your business decisions. Sample figures with some insights are shown below.

Intumescent Coating by Segment

The study includes a forecast for the global intumescent coating by type, application, end use, and region.

Intumescent Coating Market by Type [Shipment Analysis by Value from 2018 to 2030]:

Water-Based

Solvent-Based

Epoxy-Based

Intumescent Coating Market by Application [Shipment Analysis by Value from 2018 to 2030]:

Hydrocarbon

Cellulosic

Intumescent Coating Market by End Use [Shipment Analysis by Value from 2018 to 2030]:

Construction

Oil & Gas

Automotive

Others

Intumescent Coating Market by Region [Shipment Analysis by Value from 2018 to 2030]:

North America

Europe

Asia Pacific

The Rest of the World

List of Intumescent Coating Companies

Companies in the market compete on the basis of product quality offered. Major players in this market focus on expanding their manufacturing facilities, R&D investments, infrastructural development, and leverage integration opportunities across the value chain. With these strategies intumescent coating companies cater increasing demand, ensure competitive effectiveness, develop innovative products & technologies, reduce

production costs, and expand their customer base. Some of the intumescent coating companies profiled in this report include-

AkzoNobel

PPG

Notun

The Sherwin-Williams

Hempel

Promat

Kansai paints

Teknos

Carboline

3M

Intumescent Coating Market Insights

Lucintel forecasts that cellulosic will remain the larger segment over the forecast period due to rising emphasis from different health and safety agencies on workplace human safety.

APAC will remain the largest region over the forecast period due to construction sector expansion in countries such as China, India, and Indonesia.

Features of the Global Intumescent Coating Market

Market Size Estimates: Intumescent coating market size estimation in terms of value (\$B).

Trend and Forecast Analysis: Market trends (2018 to 2023) and forecast (2024 to 2030)

by various segments and regions.

Segmentation Analysis: Intumescent coating market size by type, application, end use, and region in terms of value (\$B).

Regional Analysis: Intumescent coating market breakdown by North America, Europe, Asia Pacific, and Rest of the World.

Growth Opportunities: Analysis of growth opportunities in different type, application, end use, and regions for the intumescent coating market.

Strategic Analysis: This includes M&A, new product development, and competitive landscape of the intumescent coating market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

FAQ

Q1. What is the intumescent coating market size?

Answer: The global intumescent coating market is expected to reach an estimated \$1.3 billion by 2030.

Q2. What is the growth forecast for intumescent coating market?

Answer: The global intumescent coating market is expected to grow with a CAGR of 4.0% from 2024 to 2030.

Q3. What are the major drivers influencing the growth of the intumescent coating market?

Answer: The major drivers for this market are rising preference for lightweight materials in the building & construction industry, rising urbanization and growing building & construction industry, and growing awareness, enforcing rules, and emphasizing safety precautions.

Q4. What are the major segments for intumescent coating market?

Answer: The future of the global intumescent coating market looks promising with

opportunities in the construction, oil & gas, and automotive markets.

Q5. Who are the key intumescent coating market companies?

Answer: Some of the key intumescent coating companies are as follows:

AkzoNobel

PPG

Notun

The Sherwin-Williams

Hempel

Promat

Kansai paints

Teknos

Carboline

3M

Q6. Which intumescent coating market segment will be the largest in future?

Answer: Lucintel forecasts that cellulosic will remain the larger segment over the forecast period due to rising emphasis from different health and safety agencies on workplace human safety.

Q7. In intumescent coating market, which region is expected to be the largest in next 5 years?

Answer: APAC will remain the largest region over the forecast period due to construction sector expansion in countries such as China, India, and Indonesia.

Q.8 Do we receive customization in this report?

Answer: Yes, Lucintel provides 10% customization without any additional cost.

This report answers following 11 key questions:

Q.1. What are some of the most promising, high-growth opportunities for the intumescent coating market by type (water-based, solvent-based, and epoxy-based), application (hydrocarbon and cellulosic), end use (construction, oil & gas, automotive, and others), and region (North America, Europe, Asia Pacific, and the Rest of the World)?

Q.2. Which segments will grow at a faster pace and why?

Q.3. Which region will grow at a faster pace and why?

Q.4. What are the key factors affecting market dynamics? What are the key challenges and business risks in this market?

Q.5. What are the business risks and competitive threats in this market?

Q.6. What are the emerging trends in this market and the reasons behind them?

Q.7. What are some of the changing demands of customers in the market?

Q.8. What are the new developments in the market? Which companies are leading these developments?

Q.9. Who are the major players in this market? What strategic initiatives are key players pursuing for business growth?

Q.10. What are some of the competing products in this market and how big of a threat do they pose for loss of market share by material or product substitution?

Q.11. What M&A activity has occurred in the last 5 years and what has its impact been on the industry?
