## **Abstracts**

The economy of Israel is considered to be among the most advanced in Southwest Asia. The economy is expected to reach \$291 billion by 2018. Industrial and agricultural sectors experienced good growth despite the fact that Israel possesses limited natural resources. The country is a leader in solar technology. After the economic slowdown, the country's economy recovered strongly in 2010.

Lucintel, a leading global management consulting and market research firm, has conducted a competitive analysis on the risk factors associated with the country and presents its findings in "Israel Country Analysis 2013-2018: An Evaluation of Political, Social, Economic, and Business Risk." The report covers the risk factors associated with social, political, technological, and economic conditions of Israel, helping investors recognize various risks associated before starting a venture.

The report studied the major threats of the economy. Israel's economy has to operate in volatile political climate. In 2011, the government faced protests regarding social justice. The global financial crisis disrupted the macroeconomic and financial stability of many economies, including Israel. The GDP growth declined during the recession.

The study provides a brief overview of the key drivers. The country is technologically advanced. A rapidly developing high-tech sector makes Israel a world leader in software. Israel's economy has witnessed a growing export sector and high investment income from abroad.

This report analyzes the impact of different macroeconomic indicators of the country and their related risk factors. This report studies domestic and external economic risk,

political risk, and technological risk. In the current economic scenario of the consumption patterns, the employment scenario and trade structure are likely to be affected.
