Abstracts

Mauritius is the world's 126th largest country by nominal GDP. The country's economy is expected to grow with a moderate CAGR to reach \$15.7 billion by 2018. The country has been lauded for its strong economic growth, high foreign direct investment (FDI) inflows, low debt levels, prudent fiscal management, and sound macro policy framework in the recent years. The geostrategic location of the country adds an edge to its economy.

Lucintel, a leading global management consulting and market research firm, has conducted a competitive analysis on the various risk factors associated with the country and presents its findings in "Mauritius Country Analysis 2013-2018: An Evaluation of Political, Social, Economic, and Business Risk." This study provides a concise overview of the political, economic, social, technological, and business risk analysis of Mauritius.

The report analyzes the country's major economic challenges. Economic growth of the country contracted in 2012 in the wake of the global economic slowdown. Mauritius is expected to post growth in 2013 as the global economy starts its recovery. Dependency on exports to Europe is a major risk associated with the country. Mauritius is minimizing its risk by diversifying to the other emerging markets.

The study also focuses on the key drivers. The country benefits from its geographical location lying in the Indian Ocean between Asia, Africa, and Australia. The proximity to these markets creates immense potential with its increasing international trade. Mauritius has a young educated work force that ensures high productivity.

The study provides up-to-date information on the market share, capabilities, and

strategies of various business sectors in Mauritius. This report analyzes the impact of economic factors such as sovereign debt, fiscal deficit, and current account deficit on the country's economy/industries outlook. This also analyzes the country's capability in dealing with internal and external forces.
