Abstracts

The future of the PA66 market looks promising with opportunities in the textile & industrial, automotive, electrical and electronics, consumer goods, and industries. The Middle Eastern and North African PA66 market is expected to decline in 2020 due to the global economic recession led by COVID-19. However, the market will witness recovery in the year 2021, and it is expected to reach an estimated \$16.6 billion by 2025 with a CAGR of 1%-3% from 2019-25. The major drivers for this market are increasing demand for automotive plastics and growth in various end use industries.

Emerging trends, which have a direct impact on the dynamics of the industry, include development of bio based polyamide with temperature resistance properties and increasing usage in lightweight automotive applications.

A total of 58 figures/charts and 27 tables are provided in this 104-page report to help in your business decisions. Sample figures with some insights are shown below.
