Non-GMO Food Trends and Forecast

The future of the global non-GMO food market looks promising with opportunities in the beverage, meat product, fruit and vegetable, dairy alternative, and animal feed markets. The global non-GMO food market is expected to grow with a CAGR of 11.5% from 2024 to 2030. The major drivers for this market are increased demand for food products made with non-GMO seeds, growing health consciousness and knowledge of the nutritional advantages of eating non-GMO food products among people, and growing support of sustainable farming practices.

A more than 150-page report is developed to help in your business decisions. Sample figures with some insights are shown below.
