Olivine Market Trends and Forecast

The future of the olivine market looks promising with opportunities in the foundry molding sand, metallurgical auxiliary material, and high temperature refractory applications. The global olivine market is expected to grow with a CAGR of 4% to 6% from 2023 to 2028. The major growth drivers for this market are increasing usage of olivine for foundry molding sand and high temperature refractory in several industries including construction, steel, and glass manufacturing.

A more than 150-page report is developed to help in your business decisions. Sample figures with some insights are shown below. To learn the scope, benefits, companies researched, and other details of the global olivine market report, please download the report brochure.

Olivine Market by Segments

Olivine Market by Segment

The study includes a forecast for the global olivine market by type, application, and region as follows:

Global Olivine Market by Type [Value (\$M) Shipment Analysis from 2017 to 2028]:

30-100 mesh

100-270 mesh

270-325 mesh

Others

Global Olivine Market by Application [Value (\$M) Shipment Analysis from 2017 to 2028]:

Foundry Molding Sand

Metallurgical Auxiliary Material

High-Temperature Refractory

Others

Global Olivine Market by Region [Value (\$M) Shipment Analysis from 2017 to 2028]:

North America

Europe

Asia Pacific

The Rest of the World

List of Olivine Companies

Companies in the market compete on the basis of product quality offered. Major players in this market focus on expanding their manufacturing facilities, R&D investments, infrastructural development, and leverage integration opportunities across the value chain. With these strategies olivine companies cater to increasing demand, ensure competitive effectiveness, develop innovative products & technologies, reduce production costs, and expand their customer base. Some of the olivine companies profiled in this report include.

Steinsvik Olivin

Sibelco

Dakduklu Minerals

Thermolith

Eryas

Egamin

Ore-Met

LTC Minerals

Scangrit

Olivine Market Insight

Lucintel forecasts that 30-100 mesh will remain the largest segment as it is utilized as fillers for various applications like rubber and plastic.

Within this market, foundry molding sand, metallurgical auxiliary material, and high temperature refractory are the major applications of olivine market. Foundry molding sand will remain the largest segment as it possess various properties, such as high thermal stability and strength that helps in reducing casting defects.

North America is expected to remain the largest region over the forecast period due to increase in demand for foundry molding sand and its growing application in several industries such as steel.

Features of Olivine Market

Market Size Estimates: Olivine market size estimation in terms of value (\$M)

Trend and Forecast Analysis: Market trends (2017-2022) and forecast (2023-2028) by various segments and regions.

Segmentation Analysis: Market size by type and application

Regional Analysis: Olivine market breakdown by North America, Europe, Asia Pacific, and the Rest of the World.

Growth Opportunities: Analysis of growth opportunities in different type, application, and regions for the olivine market.

Strategic Analysis: This includes M&A, new product development, and competitive landscape for the olivine market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

FAQ

Q1. What is the olivine market size?

Answer: The global olivine market is expected to reach an estimated \$xx billion by 2028

Q2. What is the growth forecast for olivine market?

Answer: The global olivine market is expected to grow with a CAGR of 4% to 6% from 2023 to 2028.

Q3. What are the major drivers influencing the growth of the olivine market?

Answer: The major growth drivers for this market are increasing usage of olivine for foundry molding sand and high temperature refractory in several industries including construction, steel, and glass manufacturing.

Q4. What are the major applications or end use industries for olivine?

Answer: The future of the olivine market looks promising with opportunities in the foundry molding sand, metallurgical auxiliary material, and high temperature refractory

applications.

Q5. Who are the key olivine companies?

Answer: Some of the key olivine companies are as follows:

Steinsvik Olivin

Sibelco

Dakduklu Minerals

Thermolith

Eryas

Egamin

Ore-Met

LTC Minerals

Scangrit

Q6. Which olivine application segment will be the largest in future?

Answer: Lucintel forecasts that 30-100 mesh will remain the largest segment as it is utilized as fillers for various applications like rubber and plastic.

Q7: In olivine market, which region is expected to be the largest in next 5 years?

Answer: North America is expected to remain the largest region over the forecast period due to increase in demand for foundry molding sand and its growing application in several industries such as steel.

Q8. Do we receive customization in this report?

Answer: Yes, Lucintel provides 10% Customization Without any Additional Cost.

This report answers following 11 key questions

Q.1. What are some of the most promising, high-growth opportunities for the olivine market by type (30-100 mesh, 100-270 mesh, 270-325 mesh, and others), application (foundry molding sand, metallurgical auxiliary material, high-temperature refractory, and others), and region (North America, Europe, Asia Pacific, and the Rest of the World)?

Q.2. Which segments will grow at a faster pace and why?

Q.3. Which region will grow at a faster pace and why?

Q.4. What are the key factors affecting market dynamics? What are the key challenges and business risks in this market?

Q.5. What are the business risks and competitive threats in this market?

Q.6. What are the emerging trends in this market and the reasons behind them?

Q.7. What are some of the changing demands of customers in the market?

Q.8. What are the new developments in the market? Which companies are leading these developments?

Q.9. Who are the major players in this market? What strategic initiatives are key players pursuing for business growth?

Q.10. What are some of the competing products in this market and how big of a threat do they pose for loss of market share by material or product substitution?

Q.11. What M&A activity has occurred in the last five years and what has its impact been on the industry?
