Abstracts

Unmanned aerial vehicles (UAVs) continue to be the most dynamic growth sector within the worldwide aerospace industry. Global annual spending on UAVs was \$3.4 billion in 2008 and is expected to be \$5.8 billion in 2014.

This report provides the status of the global UAV market by the end of 2008 and forecasts the market for 2009-2014 in terms of units, \$ billion, composites volume in million lbs and \$ million shipment. Learn what factors are impacting the UAV market. This market report provides trends and forecast for the worldwide UAV market in various regions such as North America, Europe and Rest of the World (ROW). This report also discusses the market shares of industry leaders, production technologies and risk in UAV market.

Material suppliers and product manufacturers need to continually stay abreast, critically analyze, and act fast to capture maximum market share and growth in UAV market.

This 119-page condensed market report provides all of the latest, as well as the critical issues concerning materials and market related to the UAVs. This report is a must have report by every company dealing with UAV market. In today's global economy, you need every advantage that you can find to keep you ahead in your business. Learn about current and future trends, identify key players, and explore the directions that this industry is heading.

Features of This Report:

To make any investment, business or strategic decisions, you need timely and

adequate information. This market report fulfills this core need. This is an indispensable reference guide for composite material suppliers, product manufacturers, investors, researchers, engineers, distributors and many more, who are dealing with UAV market. **Some of the features of this market report are:**

The market size estimates for the UAV industry.

UAV market by regions (North America, Europe and ROW) and by countries (USA, Canada, Germany, UK, France, Russia, Israel (etc)).

Trend and forecast for the UAV market. UAV programs under development.

Competitive analysis: Market leaders and their market shares.

Composites shipment trend and forecast in terms of volume (million lbs) and \$ shipment.

Materials and production technologies for selected UAVs. Types of composites processes, major UAV and their specifications.

Risks in UAV market such as market uncertainty, costs, reliability, logistical issues, integration in controlled airspace etc.

A total of 72 figures/charts and 22 tables presented in this report to help in your business plan.

Benefits of the Report:

It saves you money, as compared to doing research in-house. (\$80,000+)

It saves you time. The report is delivered in hours vs. months of in-house data collection and report writing.

It is an un-biased source of industry facts, intelligence and insights.

It helps you make confident business decisions quickly.

Who Can Benefit From This Report?

The study is intended for material suppliers, compounders, parts fabricators, OEMs, investors, executives and consultants. The multi-client market studies from Lucintel is used by small to multi-national Fortune 500 companies and utilized for a variety of reasons:

- Business development
- Strategic planning
- Business presentation
- Competitive materials analysis
- Market Expansion
- Revenue Planning
- Investment Decision
- Budgeting

Contents

1. EXECUTIVE SUMMARY

2. INDUSTRY BACKGROUND AND CHARACTERISTICS

Definition and History

UAV Classification and Usage

Market segmentation

3. GLOBAL UAV MARKET ANALYSIS – 2008

Global UAV Market Overview 2008

UAV Market by Region

Market segmentation

4. COMPOSITES IN UAV

Trends in application of Advance Material in UAVs

Impact of composites usage in UAVs

Composites by resin, reinforcements and core material

UAV categories and Materials usage

Composite Components in various UAVs

5. TRENDS

Trends in Global UAV spending

Global UAV market by category

Trends in Market share

Trends in Composites Shipment in terms of volume (lbs) and value (\$) shipment

6. FORECASTS

Global UAV Spending

UAV market by type of applications such as civil and defense

Risk and cost analysis

Composites Forecast in UAV Market in terms of volume (lbs) and value (\$) shipment

Key Technology Developments in the Market

List Of Figures

LIST OF FIGURES (A total of 72 figures/charts are presented in this report as shown below.)

CHAPTER 1

Fig. 1.1: Porter's Five Forces model for the Global UAV industry

CHAPTER 2

Fig 2.1 Global Hawk vehicle

Fig 2.2 Picture taken from UAV by the equipments in payload

Fig 2.3 Ground control station of a UAV

Fig 2.4 An earlier version of UAV

Fig 2.5 An advanced version of UAV

Fig 2.6 A civil UAV

CHAPTER 3

Fig 3.1 Global UAV budget as portion of Global Defense Budget (US\$ B) in 2008

Fig 3.2 Industry leaders in the Worldwide UAV market 2008

Fig 3.3 Major players of UAVs by market segments

Fig 3.4 Global military spending by Region 2008

Fig 3.5 Regional military spending US\$ B in 2008

Fig. 3.6: Geographical distribution of UAV manufacturers in Mini UAV categories.

Fig. 3.7: Geographical distribution of UAV manufacturers in tactical UAV categories.

Fig. 3.8: Geographical distribution of UAV manufacturers in MALE UAV categories.

Fig. 3.9: Geographical distribution of UAV manufacturers in HALE UAV categories.

Fig. 3.10: Geographical distribution of UAV manufacturers in UCAV categories.

Fig 3.11: Breakdown of the Global UAV market (US\$ M) in 2008.

CHAPTER 4

Fig 4.1 Materials properties comparisons.

Fig 4.2 Composites percentage in different categories of UAVs

Fig 4.3 UAV categories and material usage

Fig 4.4: Comparison of composites shipment (mil lbs) in UAV market versus total

aerospace market in 2008.

Fig 4.5: Comparison of composites shipment (\$ mil) in UAV market versus total aerospace market in 2008.

Fig 4.6: Comparison of UAV market size (\$ billion) with total aerospace market in 2008.

Fig 4.7 Composites raw material inputs (US\$ K) in the Global UAV market 2008

Fig 4.8 Composites raw material usage (US\$ M) in Global UAV by application 2008.

Fig 4.9: Weight and cost relation for various UAVs.
