Abstracts

The future of the global GaN substrate looks attractive with opportunities in consumer electronics and automotive industries. The global GaN substrate market is expected to grow with a CAGR of 11.9% from 2020 to 2026. The major drivers for the growth of this market are the growing demand of GaN substrate in LED application, increasing need of higher power density for electronic devices, and increasing usage in power electronics application.

Emerging trends, which have a direct impact on the dynamics of the industry, include development of large GaN substrates and development of GaN single-crystal substrates.

A total of 65 figures / charts and 53 tables are provided in this 128-page report to help in your business decisions. A sample figure with insights is shown below. To learn the scope of benefits, companies researched, and other details of the GaN substrate report, please download the report brochure.

The study includes trends and forecast for the global GaN Substrate by diameter type, application, and end use industry, and region as follows:

By Diameter Type [\$M shipment analysis from 2015 to 2026]:
