## Abstracts

### Background:

In 2010, global military shelter shipment value topped US \$470 million and the market is expected to reach US \$516 million by 2016. The rising threat of terrorist activities coupled with the emergence of nuclear states and prevalence of conventional military threats are expected to drive defense spending across the globe thereby giving a boost to military shelters procurement in the coming years.

As per the study, flexibility and mobility are significant factors driving the shelter market. Military shelters have specific usage and are largely driven by research and development activities. The demand for composite and conventional military shelters is expected to grow with a CAGR of 4.43% and 0.29% respectively over the next five years (2011–2016). In 2011, the composite military shelter market is expected to capture 23% of the military shelter market, with strong growth in subsequent years.

Lucintel estimates that countries outside of North America and Europe will show the highest growth rate in terms of value shipments, followed by the European military shelter market and the North American shelters market (2011–2016). Vehicle mounted military shelters hold the largest share of the military shelter market and is expected to grow at a steady rate.
