Some of the perborates companies profiled in this report include Evonik, Solvay, Akzonobel, Shangyu Jiehua Chemical, Meryer Chemical Technology, and Yongtai Chemical.

In this market, industrial grade, and non-industrial grade are the major product type. Lucintel forecasts that industrial grade will remain the largest segment over the forecast period because it is expected to contribute significantly owing to the presence of chain of distributors with effective sales management.

Within this market, oxidizer, bleach, fungicides, deodorant, and others are the major application of perborates. Bleach will remain the largest segment by application type over the forecast period due to increase in the growing demand for applications having antiseptic properties and are used as disinfectants in several applications.

Asia-Pacific is expected to witness the highest growth over the forecast period due to the presence of disposable income and the purchase parity of the people residing in the countries like China, India, and Brazil are growing which is further resulting in a magnification of the overall customer base in these emergent countries.
