Lucintel forecasts that emulsifiers will remain the largest segment over the forecast period, as industrialization is increasing and land area for agriculture is decreasing, which in turn, creates demand for the use of pesticides for ensuring food security and production.

Within this market, bio-based ingredients will remain the largest segment by source over the forecast period due to increasing health hazards associated with the usage of synthetic-based inert ingredient in pesticides.

Asia Pacific will remain the largest region, and it is also expected to witness the highest growth over the forecast period, as pesticide inert ingredients are increasingly consumed by pesticide manufacturers at production facilities during the formulation stage and countries, such as India, Thailand, and Vietnam, depend on imports for pesticides.
