Within this market, crude & refined petroleum will remain the largest end use industry segment over the forecast period due to its cost-effectiveness, and also it is the mostly used medium for transportation of liquid/gas.

North America will remain the largest region over the forecast period because oil and gas companies, government bodies, and environmental agencies in the region are focused on preventing oil spills and gas leaks. This is one of the important addressable factors, as the number of pipelines has increased in the US and Canada.
