Property Management Software Trends and Forecast

The future of the global property management software market looks promising with opportunities in the housing association, property managers/ agent, and property investor markets. The global property management software market is expected to reach an estimated \$7.0 billion by 2030 with a CAGR of 7.8% from 2024 to 2030. The major drivers for this market are growing real estate market demand, especially in developing nations, rising investment in workforce management and quality monitoring, as well as, increasing demand from PMS suppliers for web-based services, particularly software as a service (SaaS).

A more than 150-page report is developed to help in your business decisions. Sample figures with some insights are shown below.
