Security Software in Telecom Market Trends and Forecast

The future of the security software in the global telecom market looks promising with opportunities in the large enterprises, small and medium enterprises (SMEs), and government organization end users. The security software in the global telecom market is expected to grow with a CAGR of 10% to 12% from 2022 to 2027. The major drivers for this market are growing incidences of cyber-attacks and data security threat, increasing use of mobile and IoT devices, and increasing demand for cloud data storage and cloud services.

Telecom Market by Component, Security Type, Deployment, and End Users

A total of XX figures / charts and XX tables are provided in this more than 150-page report to help in your business decisions. A sample figure with insights is shown below. To learn the scope of benefits, companies researched, and other details of the security software in the global telecom market report, please download the report brochure.

Security Software in the Global Telecom Market by Segments

Security Software in the Global Telecom Market by Segment

The study includes a forecast for the security software in the global telecom market by component, security type, deployment, end users, and region as follows:

Security Software in the Global Telecom Market by Component [Value (\$M) shipment analysis for 2016 – 2027]:

Solutions

Services

Security Software in the Global Telecom Market by Security Type [Value (\$M) shipment analysis for 2016 – 2027]:

Network Security

Endpoint Security

Application Security

Cloud Security

Others

Security Software in the Global Telecom Market by Deployment [Value (\$M) shipment analysis for 2016 – 2027]:

On-Premise

Cloud

Security Software in the Global Telecom Market by End User [Value (\$M) shipment analysis for 2016 – 2027]:

Large Enterprises

Small and Medium Enterprises (SMEs)

Government

Security Software in the Global Telecom Market by Region [Value (\$M) shipment analysis for 2016 – 2027]:

North America

Europe

Asia Pacific

The Rest of the World

List of Security Software in the Global Telecom Companies

Companies in the market compete on the basis of product quality offered. Major players in this market focus on expanding their manufacturing facilities, R&D investments, infrastructural development, and leverage integration opportunities across the value chain. With these strategies security software in the global telecom companies cater to increasing demand, ensure competitive effectiveness, develop innovative products & technologies, reduce production costs, and expand their customer base. Some of the security software in the global telecom companies profiled in this report include.

IBM Corporation

Dell Inc

Symantec Corporation

Trend Micro

Check Point

CyberArk

Oracle Corporation

Imperva

F-Secure

Qualys

Security Software in the Global Telecom Market Insight

Lucintel forecasts within the security software in the global telecom market, the on-premise will remain the larger segment by deployment type due to growing adoption of machine learning, Internet of Things, artificial intelligence, and other technologies by various end users.

Within the security software in the global telecom market, the large enterprise segment will remain the largest application market during the forecast period due to presence of large amount of data in such enterprises, global expansion plans by large companies, and security awareness among enterprises considering the loss in case of cyber-attacks.

North America is expected to remain the largest market due to increasing use of advanced security software, owing to growing deployment of advanced technologies in various end use markets which eventually increases the cyber-attacks and other security threats and well-structured risk assessment leading to incorporation of advanced security software in various industries.

Features of Security Software in the Global Telecom Market

Market Size Estimates: Security software in the global telecom market size estimation in terms of value (\$M)

Trend and Forecast Analysis: Market trends (2016-2021) and forecast (2022-2027) by various segments and regions.

Segmentation Analysis: Market size by component, security type, deployment type, and end users

Regional Analysis: Security software in the global telecom market breakdown by North America, Europe, Asia Pacific, and the Rest of the World.

Growth Opportunities: Analysis of growth opportunities in different component, security type, deployment type, end users, and regions for the security software in the global telecom market.

Strategic Analysis: This includes M&A, new product development, and competitive landscape for the security software in the global telecom market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

FAQ

Q1. What is the security software in the global telecom market size?

Answer: The security software in the global telecom market is expected to reach an estimated \$XX billion by 2027

Q2. What is the growth forecast for security software in the global telecom market?

Answer: The security software in the global telecom market is expected to grow at a CAGR of 10% to 12% from 2022 to 2027.

Q3. What are the major drivers influencing the growth of the security software in the global telecom market?

Answer: The major drivers for this market are growing incidences of cyberattacks and data security threat, increasing use of mobile and IoT devices, and increasing demand for cloud data storage and cloud services.

Q4. What are the major applications or end use industries for security software in the global telecom?

Answer: Major end users include large enterprises, small and medium enterprises (SMEs), and government organization.

Q5. Who are the key companies in security software in the global telecom market?

Answer: Some of the key security software in the global telecom companies are as follows:

IBM Corporation

Dell Inc

Symantec Corporation

Trend Micro

Check Point

CyberArk

Oracle Corporation

Imperva

F-Secure

Qualys

Q6. Which security software in the global telecom application type segment will be the largest in future?

Answer: Lucintel forecasts that the large enterprise segment will remain the largest application market during the forecast period due to presence of large amount of data in such enterprises, global expansion plans by large companies, and security awareness among enterprises considering the loss in case of cyberattacks.

Q7. In security software in the global telecom market, which region is expected to be the largest in next 5 years?

Answer: North America is expected to remain the largest region over next 5 years

Q8. Do we receive customization in this report?

Answer: Yes, Lucintel provides 10% Customization Without any Additional Cost.

This report answers following 11 key questions

Q.1 What are some of the most promising potential, high growth opportunities for the security software in the global telecom market by component (solutions and services), security type (network security, endpoint security, application security, cloud security, and others), deployment type (on-premise and cloud), end users (large enterprises, small and medium enterprises (SMEs), and government), and region (North America, Europe, Asia Pacific, and the Rest of the World)?

Q. 2 Which segments will grow at a faster pace and why?

Q.3 Which regions will grow at a faster pace and why?

Q.4 What are the key factors affecting market dynamics? What are the drivers and challenges of the market?

Q.5 What are the business risks and threats to the market?

Q.6 What are the emerging trends in this market and the reasons behind them?

Q.7 What are the changing demands of customers in the market?

Q.8 What are the new developments in the market? Which companies are leading these developments?

Q.9 Who are the major players in this market? What strategic initiatives are being implemented by key players for business growth?

Q.10 What are some of the competitive products and processes in this area and how big of a threat do they pose for loss of market share via material or product substitution?

Q.11 What M & A activities have taken place in the last 5 years in this market?

For any questions related to security software in the global telecom market or related to security software in the global telecom market share, security software in the global telecom analysis, security software in the global telecom market size, write Lucintel analyst at email: helpdesk@lucintel.com. We will be glad to get back to you soon.

Contents

1. EXECUTIVE SUMMARY

2. MARKET BACKGROUND AND CLASSIFICATIONS

2.1: Introduction, Background, and Classifications

2.2: Supply Chain

2.3: Industry Drivers and Challenges

3. MARKET TRENDS AND FORECAST ANALYSIS FROM 2016 TO 2027

3.1: Macroeconomic Trends (2016-2021) and Forecast (2022-2027)

3.2: Security Software in the Global Telecom Market Trends (2016-2021) and Forecast (2022-2027)

3.3: Security Software in the Global Telecom Market by Component

3.3.1: Solutions

3.3.2: Services

3.4: Security Software in the Global Telecom Market by Security Type

3.4.1: Network Security

3.4.2: Endpoint Security

3.4.3: Application Security

3.4.4: Cloud Security

3.5: Others Security Software in the Global Telecom Market by Deployment Type

3.5.1: On-Premise

3.5.2: Cloud

3.6: Security Software in the Global Telecom Market by End Users

3.6.1: Large Enterprises

3.6.2: Small and Medium Enterprises (SMEs)

3.6.3: Government

4. MARKET TRENDS AND FORECAST ANALYSIS BY REGION FROM 2016 TO 2027

4.1: Security Software in the Global Telecom Market by Region

4.2: North American Security Software in Telecom Market

4.2.1: Market by Deployment Type: on-premise and cloud

4.2.2: Market by End Users: (large enterprises, small and medium enterprises (SMEs), and government

4.3: European Security Software in Telecom Market

4.3.1: Market by Deployment Type: on-premise and cloud

4.3.2: Market by End Users: (large enterprises, small and medium enterprises (SMEs), and government

4.4: APAC Security Software in Telecom Market

4.4.1: Market by Deployment Type: on-premise and cloud

4.4.2: Market by End Users: (large enterprises, small and medium enterprises (SMEs), and government

4.5: ROW Security Software in Telecom Market

4.5.1: Market by Deployment Type: on-premise and cloud

4.5.2: Market by End Users: (large enterprises, small and medium enterprises (SMEs), and government

5. COMPETITOR ANALYSIS

5.1: Product Portfolio Analysis

5.2: Geographical Reach

5.3: Porter's Five Forces Analysis

6. GROWTH OPPORTUNITIES AND STRATEGIC ANALYSIS

6.1: Growth Opportunity Analysis

6.1.1: Growth Opportunities for the Security Software in the Global Telecom Market by Component Type

6.1.2: Growth Opportunities for the Security Software in the Global Telecom Market by Security Type

6.1.3: Growth Opportunities for the Security Software in the Global Telecom Market by Deployment Type

6.1.4: Growth Opportunities for the Security Software in the Global Telecom Market by End Users

6.1.5: Growth Opportunities for the Security Software in the Global Telecom Market by Region

6.2: Emerging Trends in the Security Software in the Global Telecom Market

6.3: Strategic Analysis

6.3.1: New Product Development

6.3.2: Capacity Expansion of the Security Software in the Global Telecom Market

6.3.3: Mergers and Acquisitions, and Joint Ventures in the Security Software in the Global Telecom Industry

7. COMPANY PROFILES OF LEADING PLAYERS

7.1: IBM Corporation

7.2: Dell Inc.

7.3: Symantec Corporation

7.4: Trend Micro

7.5: Check Point

7.6: CyberArk

7.7: Oracle Corporation

7.8: Imperva

7.9: F-Secure

7.10: Qualys
