Short Wavelength Infra-Red Lenses Trends and Forecast

The future of the global short wavelength infra-red lenses market looks promising with opportunities in the solar cell inspection and biomedical imaging markets. The global short wavelength infra-red lenses market is expected to grow with a CAGR of 8.5% from 2024 to 2030. The major drivers for this market are growing demand for swirl in various application and rising demand in the field of agriculture.

A more than 150-page report is developed to help in your business decisions. Sample figures with some insights are shown below.

Short Wavelength Infra-Red Lenses by Segment

The study includes a forecast for the global short wavelength infra-red lenses by type, application, and region.

Short Wavelength Infra-Red Lenses Market by Type [Shipment Analysis by Value from 2018 to 2030]:

Prime Lens

Zoom Lens

Short Wavelength Infra-Red Lenses Market by Application [Shipment Analysis by Value from 2018 to 2030]:

Solar Cell Inspection

Biomedical Imaging

Others

Short Wavelength Infra-Red Lenses Market by Region [Shipment Analysis by Value from 2018 to 2030]:

North America

Europe

Asia Pacific

The Rest of the World

List of Short Wavelength Infra-Red Lenses Companies

Companies in the market compete on the basis of product quality offered. Major players in this market focus on expanding their manufacturing facilities, R&D investments, infrastructural development, and leverage integration opportunities across the value chain. With these strategies short wavelength infra-red lenses companies cater increasing demand, ensure competitive effectiveness, develop innovative products & technologies, reduce production costs, and expand their customer base. Some of the short wavelength infra-red lenses companies profiled in this report include-

Edmund Optics

Navitar

Axiom Optics

Swirl Vision Systems

MKS Instruments

Beck Optronic Solutions

Hyperion Optics

Ehd Imaging

Stingray Optics

Stemmer Imaging

Short Wavelength Infra-Red Lenses Market Insights

Lucintel forecasts that prime lens will remain the larger segment over the forecast period due to higher optical performance and lower cost.

Within this market, solar cell inspection will remain the larger segment due to high usage of swirl in medical applications.

North America will remain the largest region over the forecast period due to strong presence of key players in this region.

Features of the Global Short Wavelength Infra-Red Lenses Market

Market Size Estimates: Short wavelength infra-red lenses market size estimation in terms of value (\$B).

Trend and Forecast Analysis: Market trends (2018 to 2023) and forecast (2024 to 2030) by various segments and regions.

Segmentation Analysis: Short wavelength infra-red lenses market size by type, application, and region in terms of value (\$B).

Regional Analysis: Short wavelength infra-red lenses market breakdown by North America, Europe, Asia Pacific, and Rest of the World.

Growth Opportunities: Analysis of growth opportunities in different type, application, and regions for the short wavelength infra-red lenses market.

Strategic Analysis: This includes M&A, new product development, and competitive landscape of the short wavelength infra-red lenses market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

FAQ

Q1. What is the growth forecast for short wavelength infra-red lenses market?

Answer: The global short wavelength infra-red lenses market is expected to grow with a CAGR of 8.5% from 2024 to 2030.

Q2. What are the major drivers influencing the growth of the short wavelength infra-red lenses market?

Answer: The major drivers for this market are growing demand for swirl in various application and rising demand in the field of agriculture.

Q3. What are the major segments for short wavelength infra-red lenses market?

Answer: The future of the short wavelength infra-red lenses market looks promising with opportunities in the solar cell inspection and biomedical imaging markets.

Q4. Who are the key short wavelength infra-red lenses market companies?

Answer: Some of the key short wavelength infra-red lenses companies are as follows:

Edmund Optics

Navitar

Axiom Optics

Swirl Vision Systems

MKS Instruments

Beck Optronic Solutions

Hyperion Optics

Ehd Imaging

Stingray Optics

Stemmer Imaging

Q5. Which short wavelength infra-red lenses market segment will be the largest in future?

Answer: Lucintel forecasts that prime lens will remain the larger segment over the forecast period due to higher optical performance and lower cost.

Q6. In short wavelength infra-red lenses market, which region is expected to be the largest in next 5 years?

Answer: North America will remain the largest region over the forecast period due to strong presence of key players in this region.

Q7. Do we receive customization in this report?

Answer: Yes, Lucintel provides 10% customization without any additional cost.

This report answers following 11 key questions:

Q.1. What are some of the most promising, high-growth opportunities for the short wavelength infra-red lenses market by type (prime lens and zoom lens), application (solar cell inspection, biomedical imaging, and others), and region (North America, Europe, Asia Pacific, and the Rest of the World)?

Q.2. Which segments will grow at a faster pace and why?

Q.3. Which region will grow at a faster pace and why?

Q.4. What are the key factors affecting market dynamics? What are the key challenges and business risks in this market?

Q.5. What are the business risks and competitive threats in this market?

Q.6. What are the emerging trends in this market and the reasons behind them?

Q.7. What are some of the changing demands of customers in the market?

Q.8. What are the new developments in the market? Which companies are leading these developments?

Q.9. Who are the major players in this market? What strategic initiatives are key players pursuing for business growth?

Q.10. What are some of the competing products in this market and how big of a threat do they pose for loss of market share by material or product substitution?

Q.11. What M&A activity has occurred in the last 5 years and what has its impact been on the industry?
