Abstracts

Slovakia is a modern, private sector oriented economy that has enjoyed increased economic growth encouraged by international demand. Slovakia is expected to witness modest growth over 2013-2018 and reach \$112.1 billion at current price. Slovakia is heavily dependent upon the external sectors for its economic growth. To strengthen its growth potential and improve productivity, the Slovak government has plans to implement reform processes by 2020. The economy is among the moderate performers in comparison to other European countries, even in midst of the Euro economic crisis.

Lucintel, a leading global management consulting and market research firm, has conducted a competitive analysis on Slovakia and offers its findings in its research report, "Slovakia Country Analysis 2013-2018: An Evaluation of Political, Social, Economic, and Business Risk."

Lucintel identifies a weak labor market, precarious financial situations among some Slovak households, and the need for fiscal consolidation measures by the government as major obstacles to achieve stronger economic growth in Slovakia. Drivers that are expected to give the Slovak economy competitive advantage are strong domestic demand and the presence of a lower cost, skilled labor force. Slovakia has a positive credit rating and is rated as an attractive business destination for investment. International demand is anticipated to increase, providing a boost to the Slovak economy.

This report will benefit managers of companies, fund managers, and PE firms that want to invest in Slovakia, as well as investors that seek a complete risk analysis of Slovakia's economy from all perspectives: political, economic, social, and business.

This report analyzes the impact of economic factors such as sovereign debt, fiscal deficit, and current account deficit on Slovakia's economy and industrial outlook.

Lucintel's analysis reports on Slovakia's capability of dealing with internal and external forces. It evaluates the Slovak government's measures to stabilize the economy in light of the current European debt crises. This report also analyses recent changes in monetary, fiscal, and trade policies and their impact on business in Slovakia in the coming years.

This unique report from Lucintel will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market. This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today's stringent economy, you need every advantage that you can find.

Features of This Report:

To make business, investment, and strategic decisions, you need timely, useful information. This market report fulfills this core need and is an indispensable reference guide for multinational materials suppliers, product manufacturers, investors, executives, distributors, and many more that operate in this market.
