Abstracts

The future of the spray foam insulation market looks promising with opportunities in the residential, commercial, and other end use industries. The global spray foam insulation market is expected to reach an estimated \$2.1 billion by 2023 with a CAGR of 5.4% from 2018 to 2023. The major growth drivers for this market are the stringent government regulation towards the reduction of greenhouse gas emission and to increase energy efficiency in homes and buildings.

Emerging trends, which have a direct impact on the dynamics of the spray foam insulation industry, include the development of fourth generation blowing agent and increasing green building insulation which focus on energy conservation and sustainable building practices.

A total of 157 figures / charts and 132 tables are provided in this 241 -page report to help in your business decisions. Sample figures with some insights are shown below. To learn the scope of, benefits, companies researched and other details of this spray foam insulation market report, download the report brochure.

The study includes the spray foam insulation market size and forecast for the global spray foam insulation market through 2023, segmented by application, end use

industry, product type, and region as follows:

Spray Foam Insulation Market by Application [Volume (M lbs) and \$M shipment analysis for 2012 – 2023]: Wall Insulation Roof Insulation Concrete Rehabilitation Others

Spray Foam Insulation Market by Infrastructure Type [Volume (M lbs) and \$M shipment analysis for 2012 – 2023]: Residential Commercial Others

Spray Foam Insulation Market by Product Type [Volume (M lbs) and \$M shipment analysis for 2012 – 2023]: Closed Cell Open Cell

Spray Foam Insulation Market by Region [Volume (M lbs) and \$M shipment analysis for 2012 – 2023]: North America US Canada Mexico Europe Germany France United Kingdom Russia Spain Italy Asia Pacific China Japan India The Rest of the World Brazil UAE

Some of the spray foam insulation companies profiled in this report include BASF, FFL Partners, Carlisle, Sun Capital, and Saint-Gobain are among the major suppliers of spray foam insulation.

Lucintel forecasts that wall insulation is expected to remain the largest application and to witness the highest growth over the forecast period supported by increasing demand of energy efficient insulation for home and building structures.

Within the spray foam insulation market, residential is expected to remain the largest end use industry and to witness the highest growth in the forecast period due to growth in potential homeowners who are looking for eco-friendly and energy efficient insulation for their homes and buildings.

North America is expected to remain the largest market and to witness the highest growth over the forecast period supported by increasing residential construction and government regulations for energy efficiency.

Some of the features of “Spray Foam Insulation Market Report: Trends, Forecast and Competitive Analysis” include:

Market size estimates: Global spray foam insulation market size estimation in terms of value (\$M) and volume (M Lbs.) shipment. Trend and forecast analysis: Market trend (2012-2017) and forecast (2018-2023) by application, and end use industry. Segmentation analysis: Global spray foam insulation market size by various applications such as application, end use industry, and product type in terms of value and volume shipment. Regional analysis: Global spray foam insulation market

breakdown by North America, Europe, Asia Pacific, and the Rest of the World. Growth opportunities: Analysis on growth opportunities in different applications and regions of spray foam insulation in the global spray foam insulation market. Strategic analysis: This includes M&A, new product development, and competitive landscape of spray foam insulation in the global spray foam insulation market. Analysis of competitive intensity of the industry based on Porter's Five Forces model.

This report answers following 11 key questions:

- Q.1 What are some of the most promising potential, high-growth opportunities for the global spray foam insulation market by product type (closed cell and open cell), end use industry (residential, commercial, and others), application (wall insulation, roof insulation, concrete rehabilitation, and others), and region (North America, Europe, Asia Pacific, and the Rest of the World)?
- Q.2 Which segments will grow at a faster pace and why?
- Q.3 Which regions will grow at a faster pace and why?
- Q.4 What are the key factors affecting market dynamics? What are the drivers and challenges of the spray foam insulation market?
- Q.5 What are the business risks and threats to the spray foam insulation market?
- Q.6 What are the emerging trends in this spray foam insulation market and the reasons behind them?
- Q.7 What are the changing demands of customers in the spray foam insulation market?
- Q.8 What are the new developments in the spray foam insulation market? Which companies are leading these developments?
- Q.9 Who are the major players in this spray foam insulation market? What strategic initiatives are being implemented by key players for business growth?
- Q.10 What are some of the competitive products and processes in this spray foam insulation area and how big of a threat do they pose for loss of market share via material or product substitution?
- Q.11 What M & A activities have taken place in the last 5 years in this spray foam insulation market?
