Some of the starter culture companies profiled in this report include Chr. Hansen, DSM, DuPont, Genesis Laboratories, Sacco SRL, Mediterranean Biotechnologie SRL, Biochem SRL, Dalton Biotechnologie SRL, THT, and CSK Food.

Lucintel forecasts that bacteria will remain the largest microorganism segment over the forecast period, as they are used in large-scale application in dairy & dairy-based products.

Within this market, freeze-dried starter cultures will remain the largest form segment over the forecast period due to the properties of these cultures, like they can easily be rehydrated, depending on the application's requirement and used in various application areas, such as fermented milk and cheese.

Europe will remain the largest region, and it is also expected to witness the highest growth over the forecast period due to the production and consumption of cheese in the European Union, which plays a key role in extending the shelf-life to support exports to other regions.
