Some of the stucco companies profiled in this report include Sika, Cemex, BASF, Omega Products, Dryvit Systems, The Quikrete, Sto Group, DuPont, California Stucco Products, and Western Blended Products.

Lucintel forecasts that traditional stucco will remain the largest type segment over the forecast period, as it has superior properties, such as high strength, prolonged durability, fire-resistance, and ability to fight moisture.

Within this market, residential will remain the largest end use segment over the forecast period due to the lower cost of stucco than other plasters used for residential construction, as a result of its superior durability and high tensile strength.

Asia Pacific will remain the largest region, and it is also expected to witness the highest growth over the forecast period because the need for new construction and retrofitting or rehabilitation of older construction, increasing number of new housing units, and huge investments in the non-residential sector are driving the demand for stucco in this region.
