Sunscreen Chemicals in Cosmetic Chemical Market Insights

Lucintel forecasts that lotion will remain the largest form segment over the forecast period as it has high moisture content that helps in hydrating the skin and counteracting the drying effect of sun exposure.

Offline is expected to remain the larger distribution segment because it enables

consumers to touch, smell, and test the products before making a purchase from a wide range of availability.

North America will remain the largest region due to increasing demand for organic and natural formulations and growing awareness of harmful effects of prolonged sun exposure among consumers in the region.
