## Abstracts

Sweden is a federal state located in Northern Europe, bordering the Baltic Sea, the Gulf of Bothnia, Finland, and Norway. The country covers an area of 449,964 square kilometers (173,732 square miles). The Swedish GDP growth rate was hampered by the 2008-2009 global financial crisis, which affected its overall performance during 2001-2012. Global GDP is expected to grow to \$99.5 trillion by 2018, while Sweden's economy is likely to grow \$591 billion at the current price by 2018 with slight growth during 2013 to 2018.

Lucintel, a leading global management consulting and market research firm, has conducted a competitive analysis on this country and presents its findings in "Sweden Country Analysis 2013-2018: An Evaluation of Political, Social, Economic, and Social Risk." This study provides a concise overview of the political, economical, social, technological, and business risk associated with the country.

Lucintel discusses the various challenges faced by Sweden. After the economic slowdown, the Swedish economy recovered with a moderate GDP growth rate in 2010. The country has high household debt. Deleveraging of the household sector, which is in great disorder, can affect the banking sector of the country. This is one of the major challenges faced by Sweden. In addition, the country has an aging population, which is gradually becoming a threat to the Swedish economy, as the costs for health care and social services rise.

Lucintel's study encompasses the major drivers. Sweden has robust policy frameworks and sustained reform initiatives that have helped the country endure the economic crisis. Sweden has a high per capita income, ranking it as the world's tenth-richest

economy by that measure. It forms the backbone of Swedish economy, especially for the consumer durable industry.

This report highlights different aspects of the country including its location, economic performance, quarterly trend, sectoral contribution, foreign direct investment by industry, population trend, per capita income, trend of inflation, balance of payment, budget deficit, trade structure, foreign exchange reserve and exchange rates, and R&D expenditure.

This unique report from Lucintel will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market. This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today's stringent economy, you need every advantage that you can find.

### **Features of This Report:**

To make business, investment, and strategic decisions, you need timely, useful information. This market report fulfills this core need and is an indispensable reference guide for multinational materials suppliers, product manufacturers, investors, executives, distributors, and many more that operate in this market.
