Synthetic Based Lubricating Oil Market Insights

Lucintel forecast that polyalphaolefin (PAO) will remain the largest type segment over the forecast period owing to its properties, like hydrolytic stability and high viscosity index.

Within this market, engine oil, hydraulic fluid, metalworking fluid, compressor oil, gear oil, refrigeration oil, transmission fluid, and turbine oil are the major segments by product type. Lucintel predict that engine oil is expected to remain the largest product type segment due to its significant use in vehicles to minimize overall friction, limit metal-on-metal contact, and prevent damage.

APAC will remain the largest region due to increasing demand from automobile and petrochemical industries and presence of some major synthetic lubricant producers along with their large distribution network.
