Automotive Detection and Ranging Sensor Market Trends and Forecast

The future of the global automotive detection and ranging sensor market looks promising with opportunities in the imaging sensors, radar, ultrasonic sensor, and ranging sensor segments. The global automotive detection and ranging sensor market is expected to grow at a CAGR of 22.7% from 2021 to 2027. The major drivers for this market are rising demand for object detection, high resolution target separation, 3D detection, and 3600 object recognition technologies.

Emerging Trends in the Automotive Detection and Ranging Sensor Market

Emerging trends, which have a direct impact on the dynamics of the industry, include development of long range radar with high frequency, development of Lidar with non-moving parts, and compact size ultrasonic sensors.

A total of 77 figures / charts and 92 tables are provided in this 144-page report to help in your business decisions. Sample figures with some insights are shown below. To learn the scope, benefits, companies researched, and other details of the global automotive detection and ranging sensor market report, please download the report brochure.

Automotive Detection and Ranging Sensor Market by Segments

Lucintel forecasts that imaging sensor technology will remain the largest segment, and

Lidar segment is also expected to witness the highest growth over the forecast period. The study includes trends and forecast for the global automotive detection and ranging sensor market by technology, application, region, as follows:

Automotive Detection and Ranging Sensor Market by Technology Type [\$M shipment analysis from 2016 to 2027]:

Imaging Sensors

By Type

Monocular Camera

Stereo Camera

Night Vision Camera

Radar

By Frequency

24 GHz

77 GHz

79 GHz

By Range

Short Range

Mid-Range

Long Range

Ultrasonic Sensors

By Type

Sonar

Object Detection

Lidar

By Type

Mechanical Lidar

Static and Flash Lidar

By Range

Short Range

Mid-Range

Long Range

Automotive Detection and Ranging Sensor Market by Application [\$M shipment analysis from 2016 to 2027]:

Blind Spot Detection

Adaptive Cruise Control

Parking Assistance/Pedestrian Detection

Others Applications

Automated Braking System

Lane Change Assistance

Rear Collision Warning

Traffic Signal Assistance

Automotive Detection and Ranging Sensor Market by Region [\$M shipment analysis from 2016 to 2027]:

North America

United States

Canada

Mexico

Europe

United Kingdom

Germany

France

Asia Pacific

Japan

China

South Korea

India

The Rest of the World

List of Automotive Detection and Ranging Sensor Companies

Companies in the market compete on the basis of product quality offered. Major players in this market focus on expanding their manufacturing facilities, R&D investments, infrastructural development, and leverage integration opportunities across the value

chain. With these strategies automotive detection and ranging sensor companies cater increasing demand, ensure competitive effectiveness, develop innovative products & technologies, reduce production costs, and expand their customer base. Some of the automotive detection and ranging sensor companies profiled in this report includes.

Continental AG

Aptiv Plc

Denso Corporation

Robert Bosch

Magna International

Valeo

ZF TRW Automotive

Automotive Detection and Ranging Sensor Market Insights

Lucintel forecasts that imaging sensor technology is the largest segment of the automotive detection and ranging sensor market, and LIDAR technology is witnessing an above average growth.

Features of the Global Automotive Detection and Ranging Sensor Market

Market Size Estimates: Global automotive detection and ranging sensor market size estimation in terms of value (\$M).

Trend and Forecast Analysis: Market trends (2016-2021) and forecast (2022-2027) by various segments.

Segmentation Analysis: Global automotive detection and ranging sensor market size by various segments, such as by technology, application in terms of value.

Regional Analysis: Global Automotive detection and ranging sensor market

breakdown by North America, Europe, Asia Pacific, and Rest of the World.

Growth Opportunities: Analysis of growth opportunities in different segments by a type and regions for the global automotive detection and ranging sensor market.

Strategic Analysis: This includes M&A, new product development, and competitive landscape of the global automotive detection and ranging sensor market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

FAQ

Q1. What is the automotive detection and ranging sensor market size?

Answer: The global automotive detection and ranging sensor market is expected to reach an estimated \$76.7 billion by 2027.

Q2. What is the growth forecast for automotive detection and ranging sensor market?

Answer: The automotive detection and ranging sensor market is expected to grow at a CAGR of 22.7% from 2021 to 2027.

Q3. What are the major drivers influencing the growth of the Automotive detection and ranging sensor market?

Answer: The major drivers for this market are rising demand for object detection, high resolution target separation, 3D detection, and 3600 object recognition technologies..

Q4. What are the major technologies or end use industries for automotive detection and ranging sensor?

Answer: Imaging sensor technology is the major segment by technology for automotive detection and ranging sensor.

Q5. What are the emerging trends in automotive detection and ranging sensor market?

Answer: Emerging trends, which have a direct impact on the dynamics of the industry, include development of long range radar with high frequency, development of Lidar with non-moving parts, and compact size ultrasonic sensors. .

Q6. Who are the key automotive detection and ranging sensor companies?

Answer: Some of the key automotive detection and ranging sensor companies are as follows:

Continental AG

Aptiv Plc

Denso Corporation

Robert Bosch

Magna International

Valeo

ZF TRW Automotive

Q7. Which automotive detection and ranging sensor application segment will be the largest in future?

Answer: Lucintel forecasts that blind spot detection will remain the largest segment, and it is also expected to witness the highest growth over the forecast period.

.Q8: In Automotive detection and ranging sensor market, which region is expected to be the largest in next 5 years?

Answer: APAC is expected to remain the largest region and witness the highest growth over the forecast period due to rising demand for advanced vehicles, increasing road accidents, and automation of vehicles.

Q9. Do we receive customization in this report?

Answer: Yes, Lucintel provides 10% Customization Without any Additional Cost.

This report answers following 6 key questions

Q.1 What are some of the most promising potential, high-growth technology opportunities for the global automotive detection and ranging sensor market?

Q.2 Which technology segment/segments will grow at a faster pace and why?

Q.3 What are the key factors affecting dynamics of different technologies? What are the drivers and challenges of these technologies in automotive detection and ranging sensor market?

Q.4 What are the business risks and threats to these technologies in automotive detection and ranging sensor market?

Q.5 What are the new technology developments in automotive detection and ranging sensor market? Which companies are leading these developments?

Q.6 Who are the major players in this automotive detection and ranging sensor market? What strategic initiatives are being implemented by key players for business growth?

For any questions related to automotive detection and ranging sensor market or related to automotive detection and ranging sensor companies, automotive detection and ranging sensor market share, automotive detection and ranging sensor market analysis, automotive detection and ranging sensor market size, write Lucintel analyst at email: helpdesk@lucintel.com. We will be glad to get back to you soon.

Contents

Table of Contents

1. EXECUTIVE SUMMARY

2. TECHNOLOGY LANDSCAPE

2.1: Technology Background and Evolution

2.2: Technology and Application Mapping

2.3: Supply Chain

3. TECHNOLOGY READINESS

3.1: Technology Commercialization and Readiness

3.2: Drivers and Challenges in Automotive Detection and Ranging Sensor Technologies

4. TECHNOLOGY TRENDS AND OPPORTUNITIES

4.1: Automotive Detection and Ranging Sensor Market Opportunity

4.2: Technology Trends and Growth Forecasts

4.2.1: Imaging Sensors

4.2.1.1: by Type

4.2.1.1.1: Monocular Cameras

4.2.1.1.2: Stereo Cameras

4.2.1.1.3: Night Vision Camera

4.2.2: Radar

4.2.2.1: by Frequency

4.2.2.1.1: 24 GHZ

4.2.2.1.2: 77 GHZ

4.2.2.1.3: 79 GHZ

4.2.2.2: by Range

4.2.2.2.1: Short Range

4.2.2.2.2: Mid Range

4.2.2.2.3: Long Range

4.2.3: Lidar

4.2.3.1: by Type

4.2.3.1.1: Mechanical

4.2.3.1.2: Solid and Flash

- 4.2.3.2: by Range
 - 4.2.3.2.1: Short Range
 - 4.2.3.2.2: Mid-Range
 - 4.2.3.2.3: Long Range
- 4.2.4: Ultrasonic Sensors
 - 4.2.4.1: by Type
 - 4.2.4.1.1: Sonar Sensors
 - 4.2.4.1.2: Object Detection Sensors
- 4.3: Technology Opportunities by Application Segment
 - 4.3.1: Adaptive Cruise Control
 - 4.3.2: Blind Spot Detection
 - 4.3.3: Pedestrian/Parking Detection
 - 4.3.4: Other Applications

5. TECHNOLOGY OPPORTUNITY BY REGION FROM 2016-2027

- 5.1: Global Automotive Detection and Ranging Sensor Market by Region
- 5.2: North American Automotive Detection and Ranging Sensor Market
 - 5.2.1: Market by Technology
 - 5.2.2: The United States Automotive Detection and Ranging Sensor Market
 - 5.2.3: Canadian Automotive Detection and Ranging Sensor Market
 - 5.2.4: Mexican Automotive Detection and Ranging Sensor Market
- 5.3: European Automotive Detection and Ranging Sensor Market
 - 5.3.1: Market by Technology
 - 5.3.2: German Automotive Detection and Ranging Sensor Market
 - 5.3.3: French Automotive Detection and Ranging Sensor Market
 - 5.3.4: The United Kingdom Automotive Detection and Ranging Sensor Market
- 5.4: APAC Automotive Detection and Ranging Sensor Market
 - 5.4.1: Market by Technology
 - 5.4.2: Chinese Automotive Detection and Ranging Sensor Market
 - 5.4.3: Japanese Automotive Detection and Ranging Sensor Market
 - 5.4.4: Indian Automotive Detection and Ranging Sensor Market
- 5.5: ROW Automotive Detection and Ranging Sensor Market
 - 5.5.1: Market by Technology

6. COMPANIES AND ECOSYSTEM

- 6.1: Product Portfolio Analysis
- 6.2: Geographical Reach

6.3: Porter's Five Forces Analysis

7. STRATEGIC IMPLICATIONS

7.1: Implications

7.2: Growth Opportunity Analysis

7.2.1: Growth Opportunities for the Global Automotive Detection and Ranging Sensor Market by Technology

7.2.2: Growth Opportunities for the Global Automotive Detection and Ranging Sensor Market by Application

7.2.3: Growth Opportunities for the Global Automotive Detection and Ranging Sensor Market by Region

7.3: Emerging Trends in Global Automotive Detection and Ranging Sensor Market

7.4: Strategic Analysis

7.4.1: New Product Development

7.4.2: Capacity Expansion of the Global Automotive Detection and Ranging Sensor Market

7.4.3: Mergers, Acquisitions, Joint Ventures, and Partnerships in the Global Automotive Detection and Ranging Sensor Market

8. COMPANY PROFILES OF LEADING PLAYERS

8.1: Continental AG

8.2: Robert Bosch GmbH

8.3: Aptiv PLC

8.4: Denso Corporation

8.5: Magna International

8.6: Valeo

8.7: ZF TRW Automotive
