The global medical device industry has experienced high growth during the last five years and is expected to continue its growth momentum, reaching approximately \$302 billion in 2017 with a CAGR of 6.1% over the next five years.

Lucintel, a leading global management consulting and market research firm, has conducted a competitive analysis of the global medical devices industry and presents its findings in -Top Five Global Medical Device Companies: Performance, Strategies, and Competitive Analysis.

The report provides detailed insight into the performance of the top five medical devices companies across the world. The analysis highlights the companies that are performing the best among the peer group, and in which areas, and therefore clarifies leading performance standards and the strengths and weaknesses of companies covered.

The medical device industry is highly fragmented and consists of surgical and infection control devices, general medical devices, cardiovascular, home healthcare, and other devices. North America dominates this industry. In this study, Lucintel thoroughly profile following five companies with detailed competitive assessments:

Abbott Laboratories

Boston Scientific

Covidien Plc.

Johnson & Johnson

Medtronic, Inc.

Lucintel's research indicates that technological advancement, growing population, and increasing aging population is expected to provide opportunities for the industry players. Technology advancement may lead to nanotechnology applications and use of surgical robots as a new segment entering into the medical device industry, and this is further expected to improve the prospects for the device market. India and China are expected to be the driving countries for growth. North America is expected to witness a considerable growth for the medical device industry over the forecast period. The cardiovascular segment represents good growth during the forecast period.

This study is intended to provide industry leaders with a concise overview of the world's top five global medical equipment companies. This discussion is limited to a comparative analysis of the subject companies, their geographic footprints, financial metrics, market performance, marketing and corporate strategies, and SWOT analysis. It excludes the equipment such as orthopedic, in-vitro diagnostic, technical aids, and such other equipment.

This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business opportunities in global medical device companies. In today's chaotic economy, you need every advantage that you can find to keep ahead in your business.
