Abstracts

The future of the glass fiber textile market looks promising with opportunities in transportation, marine, wind energy, aerospace & defense, pipe and tank, construction, electrical and electronics, consumer goods, and others. The global glass fiber textile market is declined in 2020 due to the global economic recession led by COVID-19. However, the market will witness recovery in the year 2021, and it is expected to reach an estimated \$5.7 billion by 2026 with a CAGR of 4.4% from 2021 to 2026.

The major driver for market growth is the rise in demand for end products, such as printed circuit board (PCBs), wind turbine blades, pipes and tanks, and boat hulls.

Emerging trends, which have a direct impact on the dynamics of the glass fiber textile industry, include high-performance textile for wind energy, high tensile glass fiber textile for construction market, and thinner materials in PCB market. Owens Corning, SAERTEX, CPIC Fiberglass, Jushi Group, and Taishan Fiberglass are among the major glass fiber textile manufacturers.
