Trolley Bus Market Insights

Lucintel forecasts that pure electric will remain the largest segment over the forecast period as these busses are environmentally safe and the requirement for trolley busses is anticipated to rise further with increasing interest for sustainability and measures

adopted to reduce emissions.

Local commuter transportation is expected to remain the largest segment due to higher operational life as compared to the motor buses and improving the off-wire power capabilities in order to increase the adaptability of the trolley buses.

North America will remain the fastest growing region due to high demand in transportation and increasing demand for trolley buses for traveling to commute places. Additionally, technical advancements and government's increasing R&D investments is also one of the reasons behind market uplifting.
