Two-Wheeler Catalytic Converter Market Insights

Lucintel forecasts that selective catalytic reduction (SCR) is expected to witness the highest growth over the forecast period because it aids in lowering emissions of nitrogen oxides (NOx) by infusing a urea-based solution that transforms NOx into innocuous nitrogen and water.

APAC will remain the largest region over the forecast period because of traffic jams, gas prices, and budget-conscious purchasing patterns, as well as, geared motorcycles and gearless scooters that are inexpensive, powerful, and suitable for daily commuting.
