Abstracts

The future of the US hydration bottle market looks promising with opportunities in the various outdoor activities such as camping, hiking, fitness, and travel. The US hydration bottle market is expected to reach an estimated \$2.5 billion by 2023, and it is forecast to grow at a CAGR of 3.9% from 2018 to 2023. The major drivers for the growth of this market are increasing popularity of outdoor activities, and promotional strategies by manufactures such as targeted marketing, product design, and giving more space on shelf by major retail brands.

Emerging trends which have a direct impact on the dynamics of the hydration bottle industry include increasing adoption of smart bottles with integrated hydration calculator, increasing use of glass and stainless steel bottles to reduce plastic waste, and increasing demand for vacuum insulated double walled water bottles.

A total of 47 figures/charts and 34 tables are provided in this 105 -page report to help in your business decisions. Sample figures with some insights are shown below.
