USB Car Charger Market Insights

Lucintel forecasts that USB 2.0 will remain the larger segment over the forecast period because the high-speed connection with data transfer rates of up to 480 Mbps, and the common power-delivering interfaces, which required combining many charging cable types into a single charger, have been superseded by USB 2.0.

APAC will remain the largest region over the forecast period due to increasing penetration of electric cars in the region, and the electric cars are becoming more and more popular in Japan, the country has more electric vehicle charging stations than gas stations.
