Abstracts

Over the last five years, the global LFRT industry was able to counteract the sluggish economic environment and witnessed capacity expansions as well as development of new application areas. The investment in LFRT manufacturing over the period of 2013 to 2018 (the last five years) clearly indicates its acceptance level and demand in the marketplace. All the major players in the industry have increased their global presence and production capacities. They also have introduced various new grades of materials to cater to the unmet needs of customer industries.

The companies producing LFRT are exploring market opportunities with starkly different strategies. Lucintel, a leading global management consulting and market research firm, has analyzed the global LFRT market and has come up with a comprehensive research report, "Worldwide LFRT Competitive Analysis and Leadership Study 2018." This report offers a full competitive analysis from target markets to product mapping, from selling strategies to production capabilities. This report has examined and profiled the world's leading LFRT producers. Lucintel created profiles of each competitor based on the following criteria:

A total of 48 figures/charts and 5 tables are provided in this 100-page report to help in your business decisions. Sample figures with some insights are shown below. To learn the scope of, benefits, companies researched and other details of this report download the report brochure.
