Abstracts

Second Generation (2G) technology was launched in the year 1991 in Finland. It is based on the technology known as global system for mobile communication or in short we can say GSM. This technology enabled various networks to provide services like text messages, picture messages and MMS. In this technology all text messages are digitally encrypted due to which only the intended receiver receives message. These digital signals consume less battery power, so it helps in saving the battery of mobiles. This report elaborates the market size, market characteristics, and market growth of the 2G and 3G Switch Off industry, and breaks down according to the type, application, and consumption area of 2G and 3G Switch Off. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for 2G and 3G Switch Off in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
