Abstracts

3D CAD, or 3-dimensional computer-aided design, is technology for design and technical documentation, which replaces manual drafting with an automated process. Used by architects, engineers, and other professionals, 3D CAD provides an extra dimension to precisely visualize and share designs.

This report elaborates the market size, market characteristics, and market growth of the 3D CAD industry, and breaks down according to the type, application, and consumption area of 3D CAD. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for 3D CAD in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
