Abstracts

3D Xpoint technology is a revolution for the memory market. 3D Xpoint technology is the latest technology which uses floating gate memory technology that is used to trap electrons to store bits of information. This technology has achieved a breakthrough by achieving fastest speed and best performance in the market. 3D Xpoint technology provides non-volatile memory in which the data remains intact even when the power goes off. In the existing market non-volatile memories are available but the 3D Xpoint technology is 1000 times faster, durable and delivers 1000 times more density.

This report elaborates the market size, market characteristics, and market growth of the 3D Xpoint Technology industry, and breaks down according to the type, application, and consumption area of 3D Xpoint Technology. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
