Abstracts

An adhesion barrier is a medical implant that can be used to reduce abnormal internal scarring (adhesions) following surgery by separating the internal tissues and organs while they heal. Surgeons have realized that proper surgical technique is crucial to reduce adhesion formation.

This report elaborates the market size, market characteristics, and market growth of the Adhesion Barriers industry, and breaks down according to the type, application, and consumption area of Adhesion Barriers. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Adhesion Barriers in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
