Abstracts

An Advanced Traveller Information System (ATIS) is any system that acquires, analyzes, and presents information to assist surface transportation travellers in moving from a starting location (origin) to their desired destination. An ATIS may operate through information supplied entirely within the vehicle (autonomous system) or it can also use data supplied by the traffic management centres.

This report elaborates the market size, market characteristics, and market growth of the Advanced Traveler Information Systems industry, and breaks down according to the type, application, and consumption area of Advanced Traveler Information Systems. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Advanced Traveler Information Systems in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
